# The Largest 50 Beneficiaries in each EU Member State of CAP and Cohesion Funds

---

PRE-RELEASE

## **Abstract**

This report provides the preliminary findings of the study on “The Largest 50 beneficiaries in each EU Member State of CAP and Cohesion Funds” prepared at the request of the CONT committee.

It provides the results of an assessment of almost 300 systems for the public disclosure of the beneficiaries of the common agricultural policy (CAP) and cohesion policy. Moreover, it provides the preliminary results for the analysis of about 10 million beneficiaries of the CAP in 2018 and 2019 and more than 500 000 projects receiving cohesion funds between 2014 and 2020. Finally, it assesses the barriers to more data transparency and the possibilities to enhance the transparency.

*NOTE: This is a pre-release version of the study. Changes may occur based on the final results of the research. For internal use only.*

This document was requested by the European Parliament's Committee on Budgetary Control. It designated Ms Monika Hohlmeier to follow the study.

## EXECUTIVE SUMMARY

### Background

The Common Agricultural Policy (CAP) and the Cohesion Policy are the two largest spending areas. In 2020 they were collectively responsible for more than two-thirds of the EU budget. The monitoring systems and procedures for implementation according to the applicable legal provisions have improved significantly in recent years. Despite these efforts, the error rate (2.7% in 2019) in the disbursement of the EU funds remains above the materiality threshold.

Public and private reporting requirements are essential to allow for public and private accountability and scrutiny to detect errors. Data on the beneficiaries of the CAP and the Cohesion Policy are currently fragmented in regional, national and inter-regional reporting systems, which disclose basic information on the direct beneficiaries (i.e. company, public entity or natural person receiving payment). This makes it more difficult to get a comprehensive overview of the ultimate beneficiaries (i.e. ultimate beneficial owner of the direct beneficiary) and the amounts of EU funds received.

### Objective

The objective of this study is to address the existing difficulties in identifying direct and ultimate beneficiaries. First, it aims to assess the reporting systems set up by the Member States to disclose the direct beneficiaries. Second, it attempts to identify the direct and the largest ultimate beneficiaries of CAP and Cohesion Policy based on the existing reporting systems. Third, it identifies data protection and other regulations that might prevent that data concerning payments to companies and natural persons from being made public, as well as suggests possibilities to enhance transparency.

### Methodology

The methodology to achieve these objectives consists of three pillars. For the first pillar all the reporting systems related to the implementation of the CAP and the Cohesion policy are identified based on the information provided by the European Commission. Subsequently, these reporting systems are assessed based on specific criteria concerning the presentation, disclosure, accessibility, data protection and other information. This allows to assess the legal compliance as well as additional features and information provided.

The second pillar consists of the identification of ultimate beneficiaries of the CAP and Cohesion Policy. The information on the direct beneficiaries is obtained from national reporting systems and consolidated in a single database. The largest beneficiaries are identified and classified by types (natural person, company, public body, etc.). The largest direct beneficiaries are matched against a company database to identify the ultimate beneficiaries of corporate direct beneficiaries. Subsequently all the companies owned by ultimate beneficiaries are identified and matched to the direct beneficiaries. Finally, the amounts of EU funds are aggregated by ultimate owner to determine the 50 largest beneficiaries by Member State for both the CAP and Cohesion policy. The work to identify the largest ultimate beneficiaries is ongoing at the time of publication of the pre-release. The lists of beneficiaries in this report show the direct beneficiaries.

The third pillar consists of the identification of legal and technical barriers preventing the publication of information related to the beneficiaries of EU funds in a common EU reporting system. To this end, legal frameworks governing data disclosure and data protection have been the subject to a regulatory framework analysis, complemented with stakeholder interviews.

## Reporting systems

There exist in total 292 reporting systems covering the implementation of the CAP and the Cohesion Policy in EU Member States and the UK. All Member States have only one system each disclosing the CAP beneficiaries, while they tend to have several ones on the implementation of the Operational Programs (OPs) under the EU Cohesion Policy. The largest number of reporting systems have been found in countries with a regional or federal structure, such as Germany (30), Italy (30), and France (25). However, in most instances these countries also offer one consolidated reporting system. There are in total six countries offering no consolidated reporting system.

Regarding the information allowing the identification of beneficiaries, almost all CAP and Cohesion Policy reporting systems display the full legal name of direct beneficiaries with legal personality (e.g. companies). The CAP portal also provides the names and surnames of natural persons receiving EU financial support. This information is, however, concealed by most of the Cohesion Policy reporting systems. Similarly, information related to the location of the direct beneficiaries are more often available in the CAP reporting systems than in the Cohesion Policy systems.

None of the CAP and Cohesion policy reporting systems contains information on the ultimate beneficiaries. Disclosing this information is also not legally required. About half of the Cohesion Policy reporting systems disclose the national identification number of the beneficiary, which constitute an important indicator to determine the ultimate beneficiary. This information is available in only a minority of the CAP reporting systems. Moreover, only in exceptional cases do the reporting systems signal or indicate the natural persons or other types of beneficiaries that are ultimate beneficiaries.

In almost all the Cohesion Policy reporting systems, users can download the lists of beneficiaries. In turn, this functionality is available for about half of the CAP reporting systems. In general, reporting systems offer a very limited set of functionalities to navigate the information on direct beneficiaries. In many systems, users cannot sort or search for specific information. Finally, the majority of the systems are available only in the official national language(s). The use of other languages is mostly confined to reporting systems covering Inter-regional OPs under Cohesion Policy.

## Transparency

The main legal barriers for obtaining and disclosing information on direct and ultimate beneficiaries relate to the disclosed indicators, period and amount. More specifically, the CAP and Cohesion Policy reporting systems are currently not required to disclose the registration number of the direct beneficiaries. Alternative possibilities to identify unique beneficiaries such as a combination of name, country of residence, nationality and birth information required under the Anti-Money Laundering (AML) legislation are not required either. There are different time frames for the public disclosure of information. The CAP reporting systems are required to remove the beneficiary information two years after the financial year of funding, while the AML requires information to be stored for 5 years. Moreover, unlike for the disclosure of CAP beneficiaries, the regulatory proposal for EU funds programming period 2021-2027 governing the Cohesion Policy systems does not set any limit for the amount under which information does not need to be disclosed.

The technical barriers for obtaining and disclosing information on direct beneficiaries and ultimate beneficiaries relate to the data stored in the systems (whether they are machine readable, accessible, findable and reusable), interoperability of systems, data formats, data exchange and storage platforms, ways how the access to the data is granted and managed and the security requirements. Importantly, not all information on beneficial owners of the companies is available in the national central registers of all Member States. If the information on beneficial owner is available in a national central register, not in all Member States the information is made available to the general public.

A common EU level database on all EU funded projects is under development and only a pilot project has been initiated, so far. However, the information is not publicly disclosed.

## **Policy recommendations**

The policy recommendations are aimed to overcome the current fragmentation in the publicly disclosed CAP and Cohesion Policy beneficiary information as well as the inability to accurately determine the total funds received by ultimate beneficiaries.

A common database at EU level would cover all projects financed by CF, ESF, EAFRD, EAGF, EMFF and ERDF. A common EU database of EU funds will rely on many regional, national, inter-regional and EU organisations to provide the data. In order to create a uniform database with all beneficiaries, the disclosure requirements need to be harmonised and the data provided in the same format. This needs to be open, machine readable, accessible, findable, and re-usable, fulfilling the Open data requirements.

A common database at EU level with information on beneficiaries would not necessarily need to cover ultimate beneficiary information, though it would need to have the indicators to identify those ultimate beneficiaries. This means that it would need at least an indication of the type of beneficiary (public authority, NGO, foundation, etc.). The indicators would further have to be defined in a way that they allow to identify the ultimate beneficial owners in the databases created under the AML legislation (company registration number, VAT registration number, etc.).

Additionally, there is a need to define obligations concerning the minimum disclosure amounts for Cohesion Policy. The disclosure period should be extended to at least 5 years for the purpose of audit, control, and transparency. Finally, the beneficiaries should be informed at the time of their application for funding about the use of project, beneficiary and beneficial owner data for control and transparency purposes.

## 1. INTRODUCTION

### KEY FINDINGS

Adequate control and transparency on the spending is essential to receive the public support for public spending, whether the funds are under central management or shared with Member States.

The absence of a single database with information of the ultimate beneficiaries of the EU funds makes it more difficult to get a complete overview of the funds received by natural persons.

This study aims to collect the information on the ultimate beneficiaries from the CAP and cohesion funds in each Member State. Additionally, the study assesses the reporting systems and the barriers and possibilities to enhance the transparency on beneficiaries of EU funds.

### 1.1. Background

The Common Agricultural Policy (CAP) and Cohesion Policy represent the two largest spending areas in the EU budget. In 2020, more than two-thirds of the commitments and payments were for economic, social and territorial cohesion policies and the CAP.

Adequate control and transparency on the spending is essential to receive the public support for this spending, whether the funds are under central management or the management is shared with Member States. In the past few years, the EU has made important progress in ensuring that the funds are spent in line with the applicable legislation and that the number of identified errors (“error rates”) falls. Nevertheless, the error rate after adjusting for corrected errors (“material error”) was still 2.7% in 2019<sup>1</sup>, above the maximum 2.0%, that the European Court of Auditors (ECA) considers acceptable to fully approve the expenditures<sup>2</sup>.

Following the Financial Regulation (EU) No 2018/1046, the European Commission has set up a database with information of the recipients of funds managed centrally or under indirect management for third countries. For the funds under shared management the information on the recipients is held by the Member States, this includes the direct payments under the CAP. Data on the beneficiaries of these funds is published on the websites of the respective managing authorities, for which the European Commission provides a country by country list with links (see section 0).<sup>3</sup>

The absence of a single database with beneficiaries of all EU funds makes it more difficult to get a complete overview. Moreover, the reporting systems currently only cover direct beneficiaries (the legal or natural person receiving the payment), which are not necessarily the end or ultimate beneficiaries (the ones who benefit from the money). For example, if a natural persons, company or public body owns various companies that receive funds across countries, the companies receiving the funds appear in the reporting systems of the respective countries.

<sup>1</sup> Ineligible costs and infringements of public procurement rules formed the main types of errors.

<sup>2</sup> [https://www.eca.europa.eu/Lists/ECADocuments/annualreports-2019/annualreports-2019\\_EN.pdf](https://www.eca.europa.eu/Lists/ECADocuments/annualreports-2019/annualreports-2019_EN.pdf)

<sup>3</sup> [https://ec.europa.eu/info/food-farming-fisheries/key-policies/common-agricultural-policy/financing-cap/financial-assurance/beneficiaries\\_en](https://ec.europa.eu/info/food-farming-fisheries/key-policies/common-agricultural-policy/financing-cap/financial-assurance/beneficiaries_en); [https://ec.europa.eu/regional\\_policy/en/atlas/beneficiaries/](https://ec.europa.eu/regional_policy/en/atlas/beneficiaries/)

Indeed, there are two complicating factors in obtaining a full understanding of the ultimate beneficiaries of EU funds. First, the information on the recipients of the funds is not publicly available in a single database. Apart from creating a difficulty to find the beneficiaries, the split-up also reduces the ability to aggregate the information for beneficiaries receiving funds from multiple sources and/or in multiple Member States. Second, the funds are received by natural persons, public bodies and companies (limited liability companies, partnerships, sole traders, etc.). The companies receiving the funds can be connected through shareholder relations. The identification of the ultimate beneficiaries would allow naming the natural persons and companies that receive funds through various companies.

## 1.2. Main objectives and scope

Against this background, we can summarise the main objectives of the study as follows:

- Objective 1: Identify the ultimate beneficiaries of CAP and cohesion funds. This should identify the beneficiaries within and across Member States, by funds and by legal status.
- Objective 2: Assess the reporting systems that have been set up at EU and Member State level to identify recipients and end beneficiaries of funds (e.g. possibilities and/or difficulties to identify owners of companies, identifying best practices).
- Objective 3: Identify data protection regulations and other regulations that might prevent that data concerning payments to companies and natural persons are made public and/or are given to authorities responsible for ensuring the sound management of EU funds, including the European Commission and the European Parliament as discharge authority.

The current study aims to address these objectives by seeking to collect the information on the ultimate beneficiaries from the CAP and cohesion funds in each Member State. Additionally, the study assesses the reporting systems and the barriers and possibilities to enhance the transparency on beneficiaries of EU funds.

## 1.3. Reading guide

The remainder of this study first provides in **chapter 2** an **overview of the methodologies** used to gather and analyse the information collected for this study. This includes descriptions of the compilation of two databases with beneficiaries and reporting systems respectively. Moreover, provides results of the interviews held with various stakeholders to identify best practises among reporting systems as well as possibilities to enhance the transparency. Additionally, the main limitations of the methodology are discussed.

**Chapter 3** gives an overview of the reporting systems currently used for both CAP and cohesion funds beneficiaries. Moreover, the chapter also identified best practices among these reporting systems.

**Chapter 4** delves into the legal aspects related to the transparency of the beneficiary information. The legal barriers to the disclosure of ultimate beneficiaries are identified and the potential alternatives are assessed.

Finally, **chapter 5** draws **conclusions** regarding the beneficiaries, reporting systems and transparency about beneficiaries of CAP and cohesion funds. Moreover, it provides policy recommendations to enhance the transparency.

## 2. METHODOLOGY

### KEY FINDINGS

Identifying the largest ultimate beneficiaries of CAP and cohesion funds is a complicated process, requiring several steps; including identifying and harvesting the reporting systems, consolidation of the obtained data, matching the receivers with the available company database, identification of the ultimate beneficiaries holdings and preparation of the list with the top 50 beneficiaries.

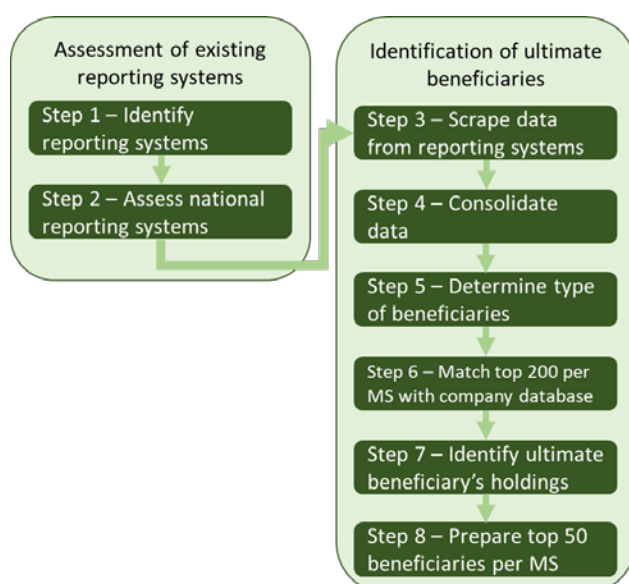

Due to the lack of unique identifiers and inability to access ultimate ownership databases, it is currently impossible for non-public authorities to determine the ultimate beneficiaries with complete certainty.

The legal barriers and possible policy solutions are assessed based on a combination of desk research and interviews.

### 2.1. Assessment of existing reporting systems

This section describes and assesses the existing systems to report information on the beneficiaries of the CAP and Structural Funds. It covers both the rules and technical aspects of the reporting systems to disclose the information on the recipients of the funds. In this sense, it also forms the base for the identification of the ultimate beneficiaries (see Figure 2.1).

**Figure 2.1 Methodology for the study**

Source: Authors' elaboration.

### 2.1.1. Step 1. Identifying reporting systems with beneficiary information

In the first step, all the reporting systems were identified. The webpages of the European Commission with links to the national and cross-national websites with information on the beneficiaries of the CAP<sup>4</sup> and the cohesion policy<sup>5</sup> were used to identify all websites with information on the beneficiaries.

The beneficiaries of the CAP are all included in one reporting system for each Member State. There were in total 28 reporting systems assessed for 2018 and 2019. Even though the UK is no longer a member of the European Union, it is also included in order to cover the entire budget for the years analysed. The information on the beneficiaries of the Cohesion Policy instruments dispersed across in approximately 250 reporting systems. There are between 1 and 31 reporting systems in place for each Member State covering the beneficiaries in these countries.

Important to note, that the European Commission's official list of reporting systems for the Cohesion Policy was incomplete, missing approximately 31 reporting systems (about 10% of the total number of databases for Cohesion Policy). Most of these missing reporting systems could actually be identified with the support from the European Commission. Ultimately, there were six platforms for which the information had to be obtained from the responsible authorities and organisations after one or more requests from the research team.

### 2.1.2. Step 2. Assessment of the reporting systems

Under the second step, the reporting systems identified under the first step were assessed. The assessment was based on the presentation and accessibility of the information required to be published according to the transparency rules as well as additional information disclosed beyond the legal requirement. More specifically, each reporting system was assessed using the same criteria included in a scorecard (see Annex 1. Score card).

The scorecard is based on the legal requirements, assessment of a small number of national reporting systems and the research team's extensive expertise. The legal requirements consider both Chapter IV of Title VII of the CAP Regulation<sup>6</sup> on Transparency and Chapter VI of the CAP Implementing Act on Transparency<sup>7</sup>. Based on the sample of national reporting systems, several additional indicators (other information, contact possibility, etc.) were included to assess the accessibility, user-friendliness and usefulness of the information. For example, unique identifiers are important to avoid double counting as well as linking the databases with other data sources.

*The results of the assessment described above are presented in Chapter 3 on the reporting systems of both the CAP and Cohesion Funds.*

## 2.2. Identification of beneficiaries

This section discusses the approach to identify the biggest beneficiaries of funds from the Common Agricultural Policy and the structural funds in each Member State.

### 2.2.1. Step 3. Scraping beneficiary information from national websites

Based on the Commission list identified in step 1, the national reporting systems with databases are identified. For each of the national databases, the lists with beneficiaries and additional related

---

<sup>4</sup> [https://ec.europa.eu/info/food-farming-fisheries/key-policies/common-agricultural-policy/financing-cap/financial-assurance/beneficiaries\\_en](https://ec.europa.eu/info/food-farming-fisheries/key-policies/common-agricultural-policy/financing-cap/financial-assurance/beneficiaries_en)

<sup>5</sup> [https://ec.europa.eu/regional\\_policy/en/atlas/beneficiaries/](https://ec.europa.eu/regional_policy/en/atlas/beneficiaries/)

<sup>6</sup> Articles 111 to 114 of Regulation (EU) No 1306/2013.

<sup>7</sup> Articles 57 to 62 of Commission Implementing Regulation (EU) No 908/2014.

information were retrieved to create consolidated databases for the CAP (2018 and 2019) and Cohesion Policies (one database covers the period from 2014 to 2020).

Not all reporting systems provide market capitalisation in a download-friendly format, and some limit the number of downloadable search results (e.g. 1 500 for the CAP beneficiaries in Germany), the display of search results (e.g. 10 to 100 beneficiaries per page) or search possibilities. For these websites web-scraping had to be used to obtain all information on the beneficiaries.

The CAP information was available only for years 2018 and 2019 when the exercise started (August 2020). Information for Cohesion Funds for most countries is available for a longer period (i.e. 2014 to 2020). This means that the amounts for CAP are covering a single year, whereas the figures for the Cohesion funds cover seven years.

### 2.2.2. Step 4. Data Consolidation

The possibility to determine the top 50 ultimate beneficiaries per Member State is limited by various factors. First, there are about 5 million beneficiaries of the CAP and around 500 000 beneficiaries of the Cohesion Funds each year, which makes it nearly impossible to determine for each of the beneficiaries the ultimate beneficiaries. Second, for a substantial number of beneficiaries it is difficult, if not impossible, to attribute the receipts from CAP and Cohesion funds to private individuals. This includes companies (e.g. cooperatives) with a dispersed ownership for which the shareholder names are not (publicly) available, non-limited liability companies such as partnerships of which the ownership information is not always available in public registers, but also public bodies and non-profit organisations without clear ownership. Third, a significant part of the beneficiaries is anonymised, specifically those receiving amounts up to EUR 1 250.

Considering these limitations, this exercise aimed to retrieve the top 50 ultimate beneficiaries per Member State as accurately as possible. For this, the focus was on the largest beneficiaries, which are most likely to be linked to the largest ultimate beneficiaries.

Therefore, the largest beneficiaries were identified by Member State. To determine the largest beneficiaries for each of the three consolidated databases (CAP 2018 and 2019 as well as Cohesion Policy 2014-2020) the aggregated amount of funds received was calculated. Indeed, this took account of the fact that some beneficiaries received funds from more than one measure. As the names of several beneficiaries could be identical also the city and/or postal code was used to identify beneficiaries that have multiple lines in the database.

### 2.2.3. Step 5. Determining types of beneficiaries

In step 5, for each of the beneficiaries were categorised according to their legal form (i.e. natural person/proprietary trader/partnership, limited liability company, non-for profit or public body).

The legislation requires to provide the names of both the natural persons and companies. This, in theory, allows to determine the type of beneficiary fairly easily as the legal form should be identifiable based on an acronym of the legal form in the name of the company. The natural person names can be identified using the construct of personal names (first and last name). In practice, it is more difficult as not all reporting systems provide the full official name with the acronyms. Similarly, based on the names it is often not possible to differentiate between proprietary traders/partnerships and natural persons as there is no indication in the name. Moreover, the anonymised recipients cannot be categorised as per legal requirement. The issues of anonymization and that of natural persons vs proprietary traders was primarily a challenge concerning the CAP databases.

*This identification of the types of beneficiaries is currently being fine-tuned, especially the identification of public bodies and not for profit beneficiaries requires significant efforts as they often do not have indicators of their legal form in their names.*

#### 2.2.4. Step 6. Matching top 200 recipients with company database

In order to determine the ultimate beneficiaries of the funds as well as their potential other receipts, additional information is required which the reporting systems currently do not provide. This information was obtained by matching the lists of the 200 largest beneficiaries per Member State to the entries in the databases of Bureau van Dijk (**Orbis Europe**)<sup>8</sup>. This matching with the databases allowed adding information on owners, shareholders and their other holdings (subsidiaries, partnerships, etc.). In addition, manual double-checking of several of the individual businesses matched were performed.

In order to be able to provide accurate lists of the top 50 ultimate beneficiaries per Member State, at least the 200 largest direct beneficiaries were matched with the company database. The largest agricultural companies and owners with more than 25% ownership were also matched to ensure that the most likely ultimate beneficiaries are checked.

#### 2.2.5. Step 7. Identifying ultimate beneficiary' holdings

The typology is used in combination with the ownership data obtained from the Bureau van Dijk Orbis databases to identify the ultimate beneficiaries. For these ultimate owners the potential subsidiaries and partnerships were determined. For all these subsidiaries and partnerships, it was determined whether they have are themselves beneficiaries of EU funds or if they have interests in other beneficiaries.

This step was performed based on the ownership information obtained from Orbis Europe for the largest beneficiaries as well as matches of the former with the names of the other beneficiaries. Importantly, this step took into consideration both domestic as well as foreign subsidiaries and partnerships in the EU28.

In line with the current practice to identify ultimate beneficiary owners under the Anti-Money Laundering legislation in most Member States, a minimum threshold of 25% is applied to the ownership. The EU funds received are fully attributed to the owners of more than 50% of the companies, while the EU funds are attributed pro-rata to the owners of 25% to 50% equity.

*This step has only been partially completed in this version of the report. The current version only takes into consideration owners that hold more than 50% of the shares, while other undertakings of natural persons/sole proprietaries/partnerships that benefit from EU funds still need to be identified.*

#### 2.2.6. Step 8. Preparation of top 50 beneficiaries per Member State

In step eight, the lists with the largest 50 ultimate beneficiary owners per Member State are to be prepared.

For this the information obtained from the previous steps is used. The amounts received are aggregated by ultimate beneficiary (e.g. natural person/partnership, company, not for profit or public body). Based on this a ranking of the top 50 ultimate beneficiaries by Member State is presented in separate lists.

---

<sup>8</sup> <https://www.bvdinfo.com/en-gb/our-products/data/international/orbis>

*In this version of the report the preliminary list of top 50 beneficiaries per Member State for the CAP and Cohesion funds are presented in Annex 7, 8 and 9. These lists will be revised when the steps above have been completed and additional sub-lists by type of beneficiary will be added.*

## 2.3. Identifying legal barriers

Desk research was used to identify the legal barriers. This assessment covers:

- Identification of requirements set in regulatory framework regarding beneficiary data disclosure including directly managed funds and funds under shared management. For instance, Treaty on the Functioning of the European Union<sup>9</sup>, Regulation (EU, Euratom) 2018/1046<sup>10</sup>, Commission Regulation (EU) No 1407/2013<sup>11</sup>, Regulation (EU) No 1291/2013<sup>12</sup>, REGULATION (EU) No 1303/2013<sup>13</sup>, Regulation (EU) 2016/679<sup>14</sup>. EU funds management related reporting requirements were recorded in a table format in order to be used to assess Member State compliance with reporting requirements;
- Identification of requirements set in the proposals for regulatory framework for EU funds 2021-2027 programming period, for instance, proposal for Common Provisions Regulation<sup>15</sup>;
- Providing examples of national legislation governing EU funds beneficiaries data disclosure, for instance, Information on the processing of personal data on the websites of the Ministry of Funds and Regional Policy<sup>16</sup> (Poland); General rules for the processing of personal data as part of European Funds<sup>17</sup> (Poland); The General Data Protection Regulation and ESF<sup>18</sup> (UK); Procedures for monitoring and implementing Structural Funds<sup>19</sup> (Latvia);
- Complementing the interview results where results had not been provided by respondents, e.g. on particular aspects of the barriers;
- Complementing the interview results with additional information to assure that all barriers are identified and assessed.

In addition, different guidance materials regarding GDPR requirements applicability were assessed. The European Data Protection Board has published several guidelines<sup>20</sup> on implementation of General Data Protection Regulation, as well as other questions regarding data protection, for instance, Guidelines 05/2020 on consent under Regulation 2016/679<sup>21</sup>, Guidelines 2/2019 on the processing of personal data under Article 6(1)(b) GDPR in the context of the provision of online services to data subjects<sup>22</sup>.

The European Union Agency For Network and Information Security (ENISA) has studied application of data protection measures on technologies, such as Privacy and data protection in mobile applications<sup>23</sup>, Recommendations on shaping technology according to GDPR provisions<sup>24</sup>, An overview on data pseudonymisation<sup>25</sup>. ENISA developed a Handbook on Security of Personal Data Processing<sup>26</sup> ahead of the GPDR, providing examples and recommendations of application of data processing measures. EU guidance on personal data<sup>27</sup>.

*The results of the assessment of the legal barriers is presented in Chapter 4 on Transparency.*

## 2.4. Stakeholder interviews

In order to obtain the views from stakeholders on the best practices, possibilities for standardisation, regulatory barriers and ideas to improve the existing rules for transparency a selected group of stakeholders were interviewed.

Ten interviews with key stakeholders were conducted at EU level (DG AGRI, DG BUDGET, DG REGIO, European Data Protection Supervisor, European Court of Auditors, European Parliament) and Member State level (selection of Ministries and authorities responsible for operating a national database).

The stakeholders provided their insights on the strengths and weaknesses of the reporting systems, the existing regulations restricting the disclosure of beneficiaries as well as the possible policy solutions. The interview guide used for the interviews is presented in Annex 2.

*The results of the interviews are used throughout the report, but primarily in Chapter 4 on Transparency.*

## 2.5. Limitations

Most of the challenges in identification of the ultimate beneficiaries have been overcome using the methodology described above. The only remaining uncertainty with the selected methodology is that the largest 50 ultimate beneficiaries cannot be found among the top 200 direct beneficiaries or in their ownership structure. To reduce the chance of this, also the EU funds received by the main actors in the agricultural sector in each of the EU28 countries were identified. Nevertheless there remains a small possibility that there are other ultimate beneficiaries behind a series of direct beneficiaries that should be in the top 50.

The main limitations, however, relate to mismatches between databases and incomplete information.

The matching in the database has to occur based solely on the names of the beneficiaries, as there are no other indicators available in most databases that allow for more accurate identification, such as corporate and personal registration numbers. The main challenge with matching based on names only is that not in all instances are the official names used in the list, names may be spelled differently, name may have changed between the times of receiving the EU funds and conducting this study, also names may not be unique within a certain geographical area.

<sup>26</sup> <https://op.europa.eu/en/publication-detail/-/publication/1a860879-1dce-11e8-ac73-01aa75ed71a1/language-en/format-PDF/source-146196923>

<sup>27</sup> [https://ec.europa.eu/info/law/law-topic/data-protection/reform/what-personal-data\\_en](https://ec.europa.eu/info/law/law-topic/data-protection/reform/what-personal-data_en)

The company database used for this project is based on the available corporate registers at national level. However, not all of these registers provide up to date and complete information on the ownership of companies. Moreover, there are also differences between types of beneficiaries and the size of these beneficiaries. Indeed, the coverage of large limited liability companies is in general much better than small sole proprietaries. The quality of the identification of the ultimate beneficiaries therefore differs across countries, type of beneficiaries and company size.

These uncertainties will remain unless access to the ultimate beneficial owner databases is granted, or the ultimate beneficiary information is added to the reporting systems as well as the unique personal or corporate identification numbers.

Finally, in this report the EU funds are attributed to the direct beneficiaries, based on which the ultimate beneficiaries are identified. In practice, other parties than the direct beneficiaries may also benefit from EU funds for the implementation of the actions. Information on these indirect beneficiaries are only included in a few of the reporting systems for the Cohesion funds.

### 3. REPORTING SYSTEMS

#### KEY FINDINGS

The information on CAP beneficiaries is collected in 28 reporting systems, one for each Member State. The Cohesion Policy reporting systems are more fragmented, amounting to about 264 databases, with no single national reporting system in six countries. This fragmentation complicates the aggregation of the data at both country and EU level.

The identification of ultimate beneficiaries is primarily complicated by a lack of unique identifiers and clear indication of type of beneficiaries. For several reporting systems, especially for CAP, it is already difficult to obtain the lists with direct beneficiaries without download options provided by the system.

This chapter provides an overview of the current reporting practices based on the results of the assessment of the reporting systems for both the beneficiaries of CAP and Cohesion funds.

#### 3.1. Reporting systems

In total 292 reporting systems were identified in the EU27 and the UK covering the CAP and Cohesion Policy beneficiaries (see Table 3.1). Most of the reporting systems are for the Cohesion Policy: there exist 264 systems reporting on beneficiaries. The latter can be divided into 180 systems covering national and regional Operational Programs (OPs) and 84 covering the implementation of the Territorial Cooperation (TC) programs. TC programmes cover beneficiaries from two or more countries. The remaining 28 reporting systems cover the beneficiaries of the CAP in the EU27 and UK. Indeed, one reporting system for each country.

**Table 3.1 Number of reporting systems**

Type of platform	NR
Common agricultural policy	28
Cohesion Policy	264
<i>o/w national and regional OPs</i>	180
<i>o/w inter-regional OPs</i>	84
Total	292

Source: Authors' elaboration.

Taking a closer look at the number of reporting systems for Cohesion Policy, there is a large difference across the EU27 Member States and the UK (see Table 3.2). France (25 reporting systems), Germany (30), Italy (30) and Poland (21) account combined for more than half of the national reporting systems for Cohesion Policy, with each more than 20 reporting systems. In addition, Greece (16) and Portugal (11) Netherlands (5) and Slovakia (6) also have numerous Cohesion Policy reporting systems. There are

nine more countries with more than one reporting systems. The remaining eleven Member States have one reporting system each for Cohesion Policy.

**Table 3.2 Number of reporting systems by country**

	Common agricultural policy	Cohesion Policy (National and regional OPs)	Cohesion Policy (Inter-regional OPs)	Total
AT	1	3	0	4

<b>Total</b>	<b>28</b>	<b>180</b>	<b>84</b>	<b>292</b>

Source: Authors' elaboration.

The availability of multiple reporting systems in a Member States does not necessarily mean that the information is fragmented. Most Member States have at least one reporting system providing a consolidated list compiling all beneficiaries. Indeed, in some Member States the operational programmes themselves also publish their own lists, which are de facto a subset of the consolidated list. In fact, there are only six countries for which no consolidated list of beneficiaries has been identified. In most of these countries the Cohesion Policy reporting systems are divided by funds

(Austria, Spain), but there also countries where they are split by region (Finland, UK) or a combination of funds and region (Ireland, Germany).

The lack of consolidated reporting systems makes it more difficult to obtain an overview of the direct beneficiaries in a particular country.

## 3.2. Presentation

The presentation of the reporting systems covers three elements, including the format used for presenting the beneficiaries, languages used for the reporting systems as well as the presentation of the EU as donor.

### 3.2.1. Format

Most of the CAP and Cohesion Policy National and regional OPs use web-based systems (see Table 3.3). While also a substantial part of the Inter-regional OPs uses web-based systems, the majority of these reporting systems are only made available via Excel spreadsheets. Finally, a minority of the Cohesion Policy reporting systems uses PDF format for the reporting.

**Table 3.3 Format of reporting system (% of reporting systems)**

Format	Common agricultural policy	Cohesion Policy (National and regional OPs)	Cohesion Policy (Inter-regional OPs)
Web-based	100%	62%	37%
Excel	0%	35%	54%
PDF	0%	2%	8%
<i>No information provided</i>	0%	1%	1%
<b>Total</b>	<b>100%</b>	<b>100%</b>	<b>100%</b>

Source: Authors' elaboration.

### 3.2.2. Languages

The information in the reporting systems is easier to follow when presented in a language mastered by the user.

There are large differences across policies as well as across countries in the number of languages used for reporting systems (see

Table 3.4). The majority of the reporting systems allows users to navigate the content in one language only. A significant number of reporting systems include a second language, while only a marginal number of reporting systems is available in three or more languages. The Cohesion Policy Inter-regional OPs more often provide more languages than the CAP and Cohesion Policy National and regional OPs.

**Table 3.4 Number of EU languages in the reporting systems (% of reporting systems)**

Number of EU languages	Common agricultural policy	Cohesion Policy (National and regional OPs)	Cohesion Policy (Inter-regional OPs)
0	0%	1%	0%
1	32%	59%	46%
2	54%	37%	27%
3	7%	3%	20%
4	7%	1%	4%
5	0%	0%	2%
<b>Total</b>	<b>100%</b>	<b>100%</b>	<b>100%</b>

Note: Reporting systems not disclosing any information are indicated to have no language.

Source: Authors' elaboration.

The CAP reporting systems are required to have the information available in their national language as well as in a widely spoken language. The CAP reporting systems are all at least available in the national language (see Table 3.5). English is the most commonly used language as second language. In total 22 reporting systems are provided in English, including three countries with English as their national language (Ireland, Malta and the UK). Additionally, there is only one language other than the official national language used in a reporting system (French).

**Table 3.5 EU languages CAP reporting systems**

EU language	Total number of reporting systems in a language	o/w official national language	Used as national language, % of total
National language	28	28	100%
English	22	3	14%
French	3	2	67%
German	4	4	100%
Greek	2	2	100%
Hungarian	2	2	100%
Italian	2	2	100%
Swedish	2	2	100%
<b>Total</b>	<b>28</b>	<b>..</b>	<b>..</b>

Source: Authors' elaboration.

The use of languages in Cohesion Policy National and regional OP reporting systems is similar to that of the CAP reporting systems (see Table 3.6). All the public reporting systems are available in the national language. English is used in about 44% of the reporting. Other languages such as German, France and Italian are used at a significant number of reporting systems as national language. Finally, Spanish is used only on a small number of platforms, but it is after English the most commonly used foreign language.

**Table 3.6 EU languages in Cohesion Policy (National and regional OPs) reporting systems**

EU language	Total	o/w official national language	% of total
National language	179	179	100%
English	79	7	9%
French	29	29	100%
German	36	36	100%
Italian	30	30	100%
Spanish	6	2	33%
<b>Total</b>	<b>180</b>	<b>..</b>	<b>..</b>

Source: Authors' elaboration.

The Inter-regional OPs are all covering areas across two or more countries. These reporting systems are therefore often also offered in several languages (see Table 3.7). However, about a quarter of the reporting systems are not provided in any of the national languages, but exclusively in English (22). Similarly, those that cover just a part of the national languages of the countries covered, also exclusively offer English if the reporting system is available in another language. Finally, those reporting systems that cover all national languages of the Member States involved are more likely to be offered in English and other EU languages such as French, German, Italian or Spanish.

**Table 3.7 Additional EU languages in Cohesion Policy (Inter-regional OPs) databases**

National language(s)	No additional languages	English	French	German	Italian	Spanish	Total
None	0	22	0	0	0	0	22
Partial	8	5	0	0	0	0	13
All	28	18	3	3	2	2	49
<b>Total</b>	<b>36</b>	<b>45</b>	<b>3</b>	<b>3</b>	<b>2</b>	<b>2</b>	<b>84</b>

Source: Authors' elaboration.

The language is also relevant for the headings in the downloads. In about fourth-fifth of the reporting systems, the heading of the data fields are available in at least one other official language of the EU.

**Table 3.8 Indication of operations (Cohesion Policy) (% of reporting systems)**

	Cohesion Policy (National and regional OPs)		Cohesion Policy (Inter-regional OPs)	
	Yes	No	Yes	No
Headings of data fields provided in at least one other official language of the Union	81%	19%	77%	23%

### 3.2.3. Presentation of the EU

Most of the recipients of EU funds such as Cohesion Policy shall acknowledge the support they receive under programmes by including the European emblem in their communication. The reporting systems for Cohesion Policy are also required to show the EU emblem visible on their websites. The large majority of the Cohesion Policy National and regional OPs' reporting systems and all those of the Inter-regional OPs show the EU emblem (see Table 3.9). On nearly all the reporting systems there are also other logos that are larger than the EU emblem. Moreover, users on most of the reporting systems need to scroll down the web page to see it. Finally, virtually all the systems make explicit reference to the name of the EU fund.

**Table 3.9 Visibility of EU funding (% of reporting systems)**

National languages	Cohesion Policy (National and regional OPs)	Cohesion Policy (Inter-regional OPs)
EU emblem visible on the website	89%	100%
EU emblem is the largest logo on the website	8%	17%
Reference to the relevant fund included	98%	98%

Source: Authors' elaboration.

### 3.3. Disclosed information

The EU Regulations governing the implementation of the CAP and the Cohesion Policy set specific requirements for the reporting systems. In particular, reporting systems should include identification information of the beneficiaries of the EU funds, location information, and funding related information.

The information reported on beneficiaries with legal personality is more complete in both CAP and Cohesion policy reporting systems than the reporting on natural persons or without legal personality (sole proprietaries, partnerships, etc.). More specifically, all of the reporting systems on CAP (100%) display the first name and the surname of natural persons receiving EU financial support measures (see Table 3.10). In turn, nearly none of the Cohesion Policy reporting systems conceal both the first and surname when the recipient is a natural person. Nearly all the reporting systems on CAP (100%) and on national and regional OPs under Cohesion Policy (94%) display the legal name of beneficiaries with legal personality. This information is missing in all the reporting systems on Cohesion Policy covering Inter-regional OPs.

Reporting systems covering the implementation of the CAP report more information about the location of beneficiaries compared to the Cohesion Policy reporting systems. In particular, 100% of the CAP systems report the municipality in which the beneficiary resides or is registered. About 61% of them report the postal code, while the region is available in only 7% of the reporting systems. The coverage is significantly lower when looking at the Cohesion Policy reporting systems. About 56-57% of the systems on national and regional OPs and 29% of those on Inter-regional OPs report the name of the municipalities and the postal code. Moreover, less than one-fourth of the systems on national and regional OPs displays information about the region (18%). This share is somewhat higher (31%) for reporting systems of Inter-regional OPs.

All the CAP reporting systems and nearly all the Cohesion Policy reporting systems display information on the amounts by beneficiaries in one or more forms. The reporting systems without information on the EU funds; 1) do not disclose any information on the beneficiaries at all, 2) do not disclose this information without indicating motivation, or 3) indicated that it did not disclose the funds because of

the specificities of the programme<sup>28</sup>. Only the reported indicators vary among systems, but primarily among policies, in line with the respective regulations. For example, information about the funds paid to each beneficiary and the allocation by fund is available for about four-fifths of all the Cohesion Policy reporting systems, while it is available for about one-fifth of the CAP reporting systems. The same is applicable for the indicator related to the eligible expenditure and co-financing rate. In turn, the large majority of the CAP reporting systems discloses information about the fund paid both by beneficiary and support measure, while this information is basically absent on the Cohesion policy reporting systems.

**Table 3.10 Information about beneficiaries (% of reporting systems)**

Indicator	Common agricultural policy		Cohesion Policy (National & Regional OPs)		Cohesion Policy (Inter-regional OPs)	
	Yes	No	Yes	No	Yes	No
<b>Identification information</b>						
First name and the surname (natural person)	100%	0%	6%	94%	0%	58%
Full legal name as registered (legal person with the autonomous legal personality)	100%	0%	74%	26%	31%	69%
<b>Location information</b>						
Municipality name (resident / registered)	100%	0%	56%	43%	29%	71%
Postal code	61%	39%	56%	44%	29%	71%
Province	7%	93%	18%	82%	31%	69%
<b>Funds-related information</b>						
Funds by measure and beneficiary	100%	0%	2%	98%	5%	95%
Funds by fund and beneficiary	21%	79%	94%	6%	82%	18%
Funds by beneficiary	100%	0%	99%	1%	89%	11%
Funds by beneficiary provide both total and amounts by measure	89%	11%	2%	98%	4%	96%
Funds financed by EAFRD include both EU and national contributions	100%	0%	N/A	N/A	N/A	N/A
Total eligible expenditure allocated to the operation	N/A	N/A	82%	18%	71%	29%
Union co-financing rate, as per priority axis	N/A	N/A	69%	31%	60%	40%

Source: Authors' elaboration.

<sup>28</sup> The programme "Suomen takausohjelma kasvuyritysten rahoituksen saatavuuden parantamiseksi" is a programme for utilizing financial instruments to facilitate financing to SMEs in Finland. It is operated under the SME Initiative framework by the European Investment Fund. Under this programme guarantees are issued on loans by private banks to their clients. Due to specificities of the financial sector, detailed information of beneficiaries is not published.

The large majority of the reporting systems on Cohesion Policy report the mandatory information about the operations financed by the EU. In particular, the name of the operation is basically always reported (see Table 3.11). About 7% of the reporting systems on national and regional OPs and 2% of the systems on Inter-regional OPs do not contain this information. These are in general systems that do not provide any information about the beneficiaries on their public systems. The large majority of the systems display a summary of the operation as well as the operations' start and end date. Nevertheless about a tenth of the national and regional OPs and about one in twenty Inter-regional OPs does not provide this information.

**Table 3.11 Indication of operations (Cohesion Policy) (% of reporting systems)**

	Cohesion Policy (National and regional OPs)		Cohesion Policy (Inter-regional OPs)	
	Yes	No	Yes	No
Operation name	93%	7%	98%	2%
Operation summary	85%	15%	85%	15%
Operation start date	91%	9%	96%	4%
Operation end date	89%	11%	95%	5%

Source: Authors' elaboration.

### 3.4. Ultimate beneficiaries

None of the reporting systems publishes ownership information, as this is not a regulatory requirement. However, it means that the ultimate beneficiaries of the EU funds are not obvious from the reporting systems.

Additionally, the reporting systems do in general not indicate the type of beneficiary, (for example, natural person, public body, etc.) which could contribute to identifying the ultimate beneficiaries. In fact, there are only a few Cohesion Policy reporting systems that distinguish between private and public beneficiaries. The indication of the type of beneficiary is useful as there are certain types of direct beneficiaries that are at the same time also the ultimate beneficiaries. For example, natural persons and most of the public bodies are the ultimate beneficiaries by definition and could be identified as such just by this piece of information. In exceptional cases, however, the way of reporting allows to identify one type of beneficiaries fairly easily. For example, the Polish CAP reporting system exceptionally reports the first and surname of natural persons in columns distinct from other entities, which allows to identify the natural persons with certainty.

For corporate beneficiaries with legal personality knowing just the type is insufficient. However, there exists a set of identification information of the direct beneficiary that can ease tremendously the identification of the ultimate beneficiary as well as the aggregation of the funds received by ultimate beneficiaries. The most important one is the national identification number. This information is available in about half of the Cohesion policy reporting systems, while it is generally absent in those monitoring the implementation of the CAP (see

Table 3.12).

**Table 3.12 Indication of company identification numbers (% of reporting systems)**

ID Numbers	Common agricultural policy	Cohesion Policy (National and regional OPs)	Cohesion Policy (Inter-regional OPs)
Yes	11%	57%	48%
No	89%	42%	52%
N/A	0%	1%	0%
Total	100%	100%	100%

Source: Authors' elaboration.

### 3.5. Data accessibility

The accessibility of the data on beneficiaries is an important attribute of reporting systems. It encompasses those aspects allowing the users to access and navigate the contents efficiently. Features improving accessibility include, for instance, the opportunity to download the data, sort or search the information as well as access to a user manual and a contact point.

#### 3.5.1. Download options

A download option is the easiest manner for most users to obtain a complete and structured overview of the direct beneficiaries. The majority of both the CAP and Cohesion Policy reporting systems allow users to download the data (see Table 3.13). The share of reporting systems allowing to download the data is very high for Cohesion policy systems reporting on national and regional OPs (90%) and for those covering Inter-regional OP (86%), which have a legal requirement to provide this possibility. Most of the Cohesion Policy reporting systems that do lack this option either do not disclose information at all or only have a few beneficiaries. The CAP reporting systems provide the option to download the beneficiary information in fewer instances. Moreover, the CAP reporting systems that provide a download option only provide this in one format, while the majority of the Cohesion Policy reporting systems provide the download in two or more formats. The CAP does not have a legal requirement to provide a download possibility.

**Table 3.13 Number of download formats offered (% of reporting systems)**

Download options	Common agricultural policy	Cohesion Policy (National and regional OPs)	Cohesion Policy (Inter-regional OPs)
0	46%	10%	14%
1	50%	34%	74%
2	0%	50%	8%
3	4%	6%	4%
Total	100%	100%	100%

Source: Authors' elaboration.

Most of the reporting systems allowing to download the beneficiary information provide the data in Comma Separated Values (CSV) and/or Excel format (see Table 3.14). Other machine-readable formats such as Text (TXT), Hyper Text Markup Language (HTML) and Extensible Markup Language (XML) are much less frequently provided. There are also some reporting systems offering the possibility to download data in a Portable Document Format (PDF), which is much more difficult to read for machines. For all of the CAP reporting systems and a significant number of the Cohesion Policy reporting systems offering the possibility to download the information in PDF is combined with other

options. However, there are also several Cohesion Policy reporting systems that offer the lists with beneficiaries just in PDF.

**Table 3.14 Download formats offered (% of reporting systems offering download options)**

Download formats	Common agricultural policy	Cohesion Policy (National and regional OPs)	Cohesion Policy (Inter-regional OPs)
CSV	60%	55%	18%
Excel	27%	90%	79%
HTML	7%	1%	0%
PDF	7%	22%	17%
TXT	7%	0%	0%
XML	7%	1%	4%

Source: Authors' elaboration.

Among the reporting systems that provide a download possibility there are some, where the downloads provide no or incomplete data.

### 3.5.2. Sorting and searching possibilities

The possibility to sort and search data is mostly important to find specific information, but in quite a few cases also the only possibility to access the data.

Most of the CAP and Cohesion Policy reporting systems do not offer **sorting** possibilities of either the entire database and/or search results. Only 14% of the CAP reporting systems, 8% of the Cohesion Policy national and regional OPs and 19% of the Inter-regional OPs (see Table 3.15). Those CAP reporting systems offering sorting possibilities, in general offer sorting according to three to five indicators. The Cohesion Policy national and regional OPs offer fewer sorting possibilities ranging between one and four. The Inter-regional OPs offer mostly a similar number of sorting possibilities, but there are exceptions with up to 7.

**Table 3.15 Number of sorting possibilities offered (% of reporting systems)**

Sorting offered	Common agricultural policy	Cohesion Policy (National and regional OPs)	Cohesion Policy (Inter-regional OPs)
None	86%	93%	83%
1 indicator	0%	2%	4%
multiple indicators	15%	6%	15%
Total	100%	100%	100%

Source: Authors' elaboration.

Looking at those reporting systems that offer sorting, there are some clear differences in the sorting criteria (see Table 3.16). All CAP reporting systems offering sorting possibilities allow to sort according to the name of the beneficiary, municipality and amount of EU funds received. In some instances complemented with sorting possibilities according to postal code, measure and fund. For the Cohesion Policy reporting systems there is no particular pattern.

**Table 3.16 Sorting offered (% of reporting systems offering sorting)**

Indicator	Common agricultural policy	Cohesion Policy (National and regional OPs)	Cohesion Policy (Inter Regional OPs)
Name	100%	31%	56%
Municipality	100%	54%	25%
Postal code	25%	23%	25%
Province	0%	38%	31%
Measure	25%	46%	88%
Fund	25%	54%	44%
Amount	100%	31%	38%
<b>Total</b>	<b>100%</b>	<b>100%</b>	<b>100%</b>

Source: Authors' elaboration.

In the large majority of the CAP reporting systems, users can **search** for specific information within the portal. In about 89% of the CAP reporting systems there are four or more fields that can be searched (see Table 3.17). The searching possibilities for the Cohesion Policy are significantly fewer. The option to search the information is offered only by about one-third of the Cohesion Policy reporting systems. These systems have fewer search fields than the CAP reporting systems. The searching possibility is also less important for Cohesion Policy as the beneficiaries are mostly available in Excel, which has relatively easy to use search and filtering functions. Moreover, there are in general much fewer beneficiaries reported on a single Cohesion Policy platform than in a CAP one, which makes searching less necessary.

**Table 3.17 Number of searching possibilities offered (% of reporting systems)**

Searching possibilities	Common agricultural policy	Cohesion Policy (National and regional OPs)	Cohesion Policy (Inter-regional OPs)
None	7%	70%	64%
1 possibility	0%	3%	12%
multiple possibilities	93%	27%	24%
<b>Total</b>	<b>100%</b>	<b>100%</b>	<b>100%</b>

Source: Authors' elaboration.

Taking a closer look at the online reporting systems (see Table 3.18), CAP systems are always offering the possibility to search information by beneficiary name, municipality and amount. The search option by measure is also very common. Search by postal code, province and fund are less available. The search of the Cohesion Policy is often limited to a simple search by name. The other search possibilities (municipality, postal code, province, measure, fund and amount) are offered on between one-fifth and half of the reporting systems covering national and regional OPs. Most of the Inter-regional OPs offering search functions allow also to search the name (83%). The other search possibilities are only offered on between one-tenth and four-tenths of the reporting systems with searching possibilities. A possible explanation for the more limited search possibilities on Inter-regional OPs than National and regional OPs reporting systems might be that the Inter-regional OPs cover, on average, fewer beneficiaries and, therefore, have simpler reporting systems.

**Table 3.18 Searching possibilities offered (% of reporting systems offering searching)**

Indicator	Common agricultural policy	Cohesion Policy (National and regional OPs)	Cohesion Policy (Inter-regional OPs)
Name	100%	85%	83%
Municipality	100%	57%	30%
Postal code	46%	24%	10%
Province	8%	31%	23%
Measure	88%	22%	43%
Fund	31%	57%	27%
Amount	100%	20%	27%

Source: Authors' elaboration.

An important element of the search possibility is also the restrictions to the searches and presentation of the search results. Indeed, when there is no downloadable overview with all beneficiaries provided the search option becomes often the best possibility to obtain the information. Almost half of the CAP reporting systems, for instance, do not provide a download possibility. Nevertheless, the collection of information on the complete list of CAP beneficiaries from the reporting systems using the provided search tools is in some cases hampered by:

- Restrictions on the provided search tool allowing only to search a name with at least a minimum number of characters;
- Restrictions on the provided search tool allowing only to search using a combination of items (e.g. municipality needs to be combined with funds);
- Restrictions on performing many searches through CAPTCHAs.
- Limiting the number of results shown per search (e.g. 1 500 beneficiaries per search in a database containing several hundreds of thousands of beneficiaries);
- Separation of the results across many pages (up to several tens of thousands of pages); and,
- Technical limitations to loading more results on the results page or when multiple pages are shown.

### 3.5.3. User manual and contact

Almost all of the CAP and Cohesion Policy reporting systems provide tools to make the use of the reporting system easier (see Table 3.19). Manuals (instructions on optimal usage of reporting system) are most frequently provided, but there are a few Cohesion Policy reporting systems also providing glossaries (description of main vocabulary). Nevertheless, there are some Cohesion Policy reporting systems not providing any such tools. These are mostly Inter-regional OPs with few beneficiaries.

**Table 3.19 Tools to ease the use of the reporting system (% of reporting systems)**

	Common agricultural policy	Cohesion Policy (National and regional OPs)	Cohesion Policy (Inter-regional OPs)
Manual	100%	98%	87%
Glossary	0%	1%	2%
None	0%	1%	11%
<b>Total</b>	<b>100%</b>	<b>100%</b>	<b>100%</b>

Source: Authors' elaboration.

For enquiries about the reported information, it is important to be able to contact the organisation responsible for the reporting system. All CAP and nearly all Cohesion Policy reporting systems provide an email or contact form and a phone number to contact (see Table 3.20). In the context of this study, no systematic assessment of the responsiveness of the reporting system has been conducted. However, the few organisations responsible for the reporting systems that were approached during the preparation of this study responded to the data request. However, often several reminders were required as well as the use of other contacts than indicated on the reporting system.

**Table 3.20 Contact information provided (% of reporting systems)**

	Common agricultural policy	Cohesion Policy (National and regional OPs)	Cohesion Policy (Inter-regional OPs)
Email address or contact form	100%	99%	98%
Phone number	100%	98%	98%

Source: Authors' elaboration.

### 3.6. Data protection information

Both the CAP and Cohesion Policy reporting systems contain personal data, which needs to be adequately processed and presented. Information about the data protection and privacy measures is a mandatory requirement. Almost all CAP and Cohesion Policy reporting systems comply with this requirement (see Table 3.21). In particular, reporting systems usually contain a description of data processing in relation to the relevant legislation and the large majority of the systems refers users to the data protection authority website.

**Table 3.21 Data protection/privacy information (% of reporting systems)**

	Common agricultural policy	Cohesion Policy (National and regional OPs)	Cohesion Policy (Inter-regional OPs)
Description of data processing in connection with data protection legislation	100%	99%	95%
Link to data protection authority	96%	97%	93%

Source: Authors' elaboration.

### 3.7. Other information

The CAP and Cohesion Policy reporting systems are usually fully dedicated to one of both policies. In fact, only 4% of the reporting systems on national and regional OPs under Cohesion Policy contains information about other existing policies (see

Table 3.22). This share increases to 15% for reporting systems on Inter-regional OPs. The highest share of reporting systems containing information on other policies is registered among the CAP reporting systems, almost one-third (32%).

**Table 3.22 Additional policies besides CAP/Cohesion Policy covered (% of reporting systems)**

	Common agricultural policy	Cohesion Policy (National and regional OPs)	Cohesion Policy (Inter-regional OPs)
Yes	32%	4%	15%
No	61%	96%	83%
N/A	7%	1%	1%
<b>Total</b>	<b>100%</b>	<b>100%</b>	<b>100%</b>

Source: Authors' elaboration.

In addition to the common set of information, some reporting systems contains other indicators. This is the case for the large majority of the portal systems for Cohesion Policy, while it is really exceptional for CAP reporting systems (4%) (See Table 3.23).

**Table 3.23 Other indicators (% of reporting systems)**

	Common agricultural policy	Cohesion Policy (National and regional OPs)	Cohesion Policy (Inter-regional OPs)
Yes	4%	77%	88%
No	96%	17%	12%
N/A	0%	3%	0%
<b>Total</b>	<b>100%</b>	<b>100%</b>	<b>100%</b>

Source: Authors' elaboration.

For CAP reporting systems the other indicators refer to the responsible paying agency (see Table 3.24). In the most cases, additional information in Cohesion Policy reporting systems refers to the category of intervention. Finally, a marginal number of reporting systems contains additional information on the priority axis and the investment priority.

**Table 3.24 Types of other indicators (% of reporting systems with other indicators)**

	Common agricultural policy	Cohesion Policy (National and regional OPs)	Cohesion Policy (Inter-regional OPs)
Responsible paying agency	100%	N/A	N/A
Category of intervention	N/A	89%	84%
Priority axis	N/A	5%	5%
Category of intervention & priority axis	N/A	5%	8%
Investment priority	N/A	1%	3%
<b>Total</b>	<b>100%</b>	<b>100%</b>	<b>100%</b>

Source: Authors' elaboration.

### 3.8. Compliance with legal requirements

All the CAP reporting systems are compliant with the legal requirements, insofar they could be assessed based on the information disclosed. The CAP disclosure has been assessed against the basic requirements in Articles 111 and 113 of Regulation (EU) No 1306/2013, such as the disclosure of name, municipality, amount and measures and information about the rights under the GDPR.

Similarly, the CAP reporting systems seem to comply with the implementing acts in Articles 57 to 59 of Commission Implementing Regulation (EU) No 908/2014. Though, there are some borderline issues. There are two countries publishing the information only in Excel (Croatia and Cyprus), which has search possibilities but one can debate whether it is a “search tool allowing the users to search for beneficiaries by either name, or municipality” as defined in Article 59. Moreover, there is one reporting system (Hungary), which has the beneficiaries for the last three instead of the two years online. They shall have the information of the last two financial years, so reporting three years is a deviation from this requirement.

Turning to the Cohesion Policy, all EU Member States have reporting systems in place to disclose the information on the Cohesion Policy OPs. However, for six countries (incl. UK) there was not a single website summarising all OPs in the country identified, as required under Article 115 1(b) of the Common Provision Regulation EU 1303/2013. These countries are Austria, Finland, Germany, Ireland, Spain and the UK. Moreover, there were several reporting platforms in eight EU Member States (Finland, France, Germany, Greece, Ireland, Italy, Slovakia and Sweden) for which no downloadable list of OPs could be identified. For all these reporting systems – except Germany - it concerned regional or fund reporting systems, for which alternative national reporting systems with all information were available. In Germany, it concerned the national reporting system, for which regional and fund reporting systems were available as alternative sources. In addition, there are several reporting systems in countries such as Finland, France and Greece, which do not offer their information in a spreadsheet allowing sorting (for instance, publication in PDF) as required under Article 115 (2) of the CPR.<sup>29</sup>

National reporting systems covering the implementation of Cohesion Policy OPs are to a large extent compliant with the CPR provisions on information disclosure. Some of the national reporting systems do not comply with the more detailed disclosure requirements in Annex XII of the CPR. In particular, seven countries do not explicitly disclose the country of the operations (Bulgaria, Estonia, France, Latvia, Malta, Poland and Slovakia). However, in most countries (except in Slovakia), this information can be obtained based on the more detailed location information (e.g. region, municipality, postal code). Slovakia is the only member states that does not report location information in its national portal. Finally, the date of the last update is not reported in the national reporting systems of seven countries (Denmark, Estonia, Greece, Lithuania, Malta, the Netherlands and Romania).

Countries without a single national reporting system have either fund-specific or region-specific reporting systems. Overall, most of them are to a large extent compliant with the information disclosure provisions. The fund-specific reporting systems available in Austria and Spain are fully compliant with the existing legal provisions, while some gaps emerge in a small set of regional reporting systems across Germany, Finland, Ireland and the UK. In particular, it was not possible to retrieve the list of beneficiaries from three reporting systems in Germany and one portal in Finland. Finally, information related to the EU co-financing rate, the category of intervention and the date of last update is missing in some of the regional systems in Finland, Ireland and the UK.

---

<sup>29</sup> The list of operations are supposed to be updated at least every 6 months under Article 115 (2) of the Common Provision Regulation EU 1303/2013. Due to the insufficient information disclosed on the national reporting systems on the last update or updating frequency, it cannot be ruled out that there are some reporting systems that are updated less than once every 6 months.

## 4. TRANSPARENCY

### KEY FINDINGS

There are legal barriers to obtaining and disclosing information on beneficiaries of EU funds, project implementers, their owners and beneficial owners. These are the limited information disclosed for natural persons, especially the lack of unique identifiers to match with the ultimate beneficiary ownership databases created according to anti-money laundering (AML) regulatory framework.

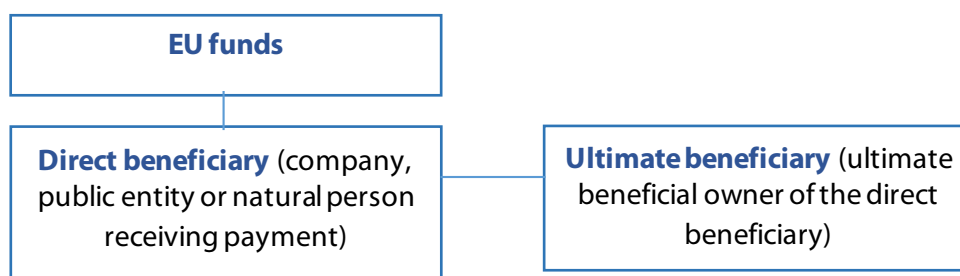

The technical barriers primarily relate to the data stored in the systems (machine readability, accessibility, findability and reusability), interoperability of systems, data formats, data exchange and storage platforms, ways of granting and managing data access.

The main policy possibilities to enhance transparency of direct beneficiaries, ultimate beneficiaries, project implementers and (ultimate beneficial) owners of implementing companies are to provide a common central database using unique personal and corporate identifiers that can be connected to the databases created for the AML policies.

This chapter identifies the barriers to the disclosure of information on beneficiaries (companies and natural persons) of CAP and Cohesion funds. Moreover, it also explores potential avenues to enhance the transparency of these EU funds. The barriers are identified through review of EU legal framework, interviews and desk research.

Barriers to disclosure of information also relate to direct and ultimate beneficiaries. In addition, large amounts of Cohesion funds are granted to public entities, and are implemented by companies referred hereafter as *project implementers*. The project implementers and beneficial owners of the project implementers are not subject of this analytical study.

**Figure 4.1 Beneficiaries of EU funds**

Source: Authors' elaboration.

Information on projects, beneficiaries, project implementers, owners and ultimate beneficial owners of companies and project implementers could be collected for: (i) audit and control purposes; (ii) transparency purposes; and (iii) programme implementation monitoring and evaluation. In this chapter the focus is on the disclosure of beneficiary information for transparency purposes, which needs to find a balance between public interest and the general data protection rights of natural persons and reporting costs.

## 4.1. Barriers to more data transparency

This section provides the legal and technical barriers information disclosure on beneficiaries, project implementers, owners and beneficial owners. It includes an analysis of rules and operational practices concerning data collection, disclosure, protection and other factors that might prevent the publication of data and/or the sharing of it with the European Commission and the European Parliament as discharge authority concerning end beneficiaries of EU funds.

Barriers to data transparency relate to three topics: i) data about projects financed by CAP and Cohesion funds (data disclosed about each project); ii) data about companies and natural persons that are the final beneficiaries of funding received and beneficial owners of the companies; and iii) data about project implementers and owners or beneficial owners of the project implementers.

### 4.1.1. Legal requirements on data disclosure

The Financial Regulation is the main point of reference for principles and procedures governing the establishment, implementation and control of the EU budget. The study relates to the EU programming period 2014-2020, therefore it assesses the legal framework for information disclosure requirements for this programming period. The recommendations for system enhancement mostly relate to the EU programming period 2021-2027, therefore the regulatory framework proposal for the new programming period is analysed in relation to data disclosure requirements.

This analytical study relates to not only beneficiaries but also owners and beneficial owners, therefore an analysis of the anti-money laundering regulatory framework governing data collection and disclosure on owners and beneficial owners is included. The analytical study also relates to project implementers, therefore public procurement data disclosure requirements are assessed.

#### **Beneficiaries - data disclosure under the Financial Regulation**

The Financial Regulation applicable to the general budget requires disclosing the name and locality of the EU funds recipient (see Annex 3). It also highlights situations when this information does not need to be disclosed, e.g. funding received under a certain limit. However, the Financial Regulation does not require to disclose the owner and beneficial owner and does not require to provide the unique identification of a natural person (e.g. individual identification number). Where natural person data are published, the information shall be removed two years after the end of the financial year in which the funds were legally committed. According to General Data Protection Regulation (GDPR), personal data concerns the name, identification number, location data and an online identifier of a natural person (see Annex 3).

#### **Beneficiaries - data disclosure under EU funds direct management**

EU funds can be implemented under direct or shared management. Direct management is implemented by the European Commission, which selects recipients of the funds, signs and manages the contracts with them. Examples of EU funds implemented under direct management include Horizon 2020 or the Connecting Europe Facility.

The Financial Transparency System (see Annex 4) is used to record and give access to information about beneficiaries under EU funds direct management system. It does not include data on natural persons, only data on corporate beneficiaries is provided. The company data does not include information on owners and beneficial owners.

Data on natural person beneficiaries is collected using the Natural Person Legal Entity Form, which is used by the European Commission for accounting and contractual purposes. It includes personal data, for instance, name, identification number, E-mail address, and personal phone number. In general, 8

out of 27 Member States do not use a personal identification number allowing the identification of natural persons. Personal data is collected as part of different contractual obligations under EU funds direct management but personal data is not publicly disclosed.

For legal entities the Private Law Body Legal Entity Form is used by the European Commission for accounting and contractual purposes. It includes company information, for instance, legal name and registration number but does not require disclosing the owner and beneficial owner. The company data is collected as part of different contractual obligations under EU funds direct management but only limited information, e.g. company name, is publicly disclosed.

### **Beneficiaries - data disclosure under EU funds shared management in EU programming period 2014-2020**

In Article 63 of the Financial Regulation, shared management is defined as “where the Commission implements the budget under shared management, tasks relating to budget implementation shall be delegated to Member States. The Commission and the Member States shall respect the principles of sound financial management, transparency and non-discrimination and shall ensure the visibility of the Union action when they manage Union funds.” CAP and Cohesion funds are implemented under shared management.

Under the reporting requirements for **CAP** in the EU programming period 2014 – 2020, natural persons are identified only by name, surname and municipality where the direct beneficiary is resident. Therefore, under the current regulatory framework it is not possible to identify unique natural persons with complete certainty as no unique personal identification number is provided. Similarly, companies are identified only by the company name and locality and no information on the company registration number, owner and beneficial owner are provided.

The Common Provisions Regulation for the **European Regional Development Fund (ERDF)**, the **European Social Fund (ESF)**, the **Cohesion Fund (CF)**, and the **European Territorial Cooperation (ETC)** fund (COM 1303/2013) does not specify any requirements regarding beneficiary data disclosure, including beneficiaries of financial instruments financed by EU funds. Financial instruments are implemented under different implementing mechanisms, including commercial banks operating as implementing bodies. In some Member States, banking laws do not allow to disclose borrowers or issuers of shares. In those cases no information is available on either direct or ultimate beneficiaries.

The **European Maritime and Fisheries Fund (EMFF)** regulation requires disclosing beneficiary names but only in accordance with national law. Under the reporting requirements for EMFF, natural persons are identified only by name, surname and postcode, therefore under the current regulatory framework it is not possible to identify the natural persons with complete certainty. Companies are identified only by company name and locality, no information on the company registration number, owner and beneficial owner needs to be disclosed (see Annex 5).

### **Beneficiaries - data disclosure under EU funds shared management in EU programming period 2021-2027**

The CAP regulatory framework proposal for the EU programming period from 2021 to 2027 includes requirements regarding information exchange and processing. The beneficiary information disclosure is based on the Common Provisions Regulation (CPR) proposal applicable to all funds under shared management (see Annex 6).

The CPR proposal (see Annex 6) includes requirements regarding beneficiary data disclosure (i.e. first name, surname and locality) and those requirements correspond to the requirements included in the

Financial Regulation. Under the CPR proposal, it is not possible to identify unique natural persons with complete certainty, as the natural person's identification code is not provided. Companies are identified only by the company name and locality. No information on the company registration number, owner and beneficial owner of the company needs to be disclosed.

The ETC Regulation proposal does not include any beneficiary data disclosure requirements

### **Owners and beneficial owners - data disclosure requirements**

The Directive (EU) 2015/849 (Fourth anti-money laundering Directive – AMLD IV) on the prevention of the use of the financial system for the purposes of money laundering and terrorist financing requires the creation of registers of beneficial owners of companies. Member States should collect information on beneficial owners of companies, but access to the information on the beneficial ownership shall be in accordance with data protection rules and the information can only be accessed in a timely manner by competent authorities (see Annex 3).

The Directive EU 2018/843 (AMLDV) enhanced transparency by setting up publicly available registers for companies and trusts. It prescribes in Article 30 that Member States need to ensure that the information on the beneficial ownership is accessible in all cases to: a) competent authorities and Financial Intelligence Units, without any restriction; b) obliged entities, within the framework of customer due diligence; c) any member of the general public, who shall be permitted to access at least the name, month and year of birth and the country of residence and nationality of the beneficial owner as well as the nature and extent of the beneficial interest held. The information on beneficial ownership remains available through the national registers and through the system of interconnection of registers for a minimum of five years.

The Council, publishes biannually the 'EU list of non-cooperative jurisdictions for tax purposes' (see Annex 3) and the list is to be taken into account when analysing owners and beneficial owners of companies.

### **Project implementers - data disclosure under public procurement regulation**

Public procurement rules are set out by Directive (EU) 2014/24. EU Member States had until April 2016 to transpose the Directive's procurement rules into national law, while the deadline for e-procurement rules was October 2018. According to the Directive, for each award, the name, of project implementer, the address (including NUTS code), the telephone and fax numbers, the email address, whether the successful tenderer is small and medium enterprise and a group of economic operators, value of the successful tender, and information whether the contract is related to a project and/or a programme financed by Union funds (see Annex 3) have needs to be disclosed.

#### **4.1.2. Legal barriers to obtaining and disclosing data**

Based on the regulatory framework analysis and interviews with different stakeholders, the main legal barriers for obtaining and disclosing information on beneficiaries, project implementers, owners and beneficial owners and project implementers are listed below.

There is no legal obligation under the Financial Regulation - the main point of reference for principles and procedures governing the establishment, implementation and control of the EU budget to publicly provide information on the beneficiary company's registration number, owner and beneficial owner. There is also no obligation to disclose the beneficiary's identification number, in case of a natural person. Similar requirements regarding data disclosure are applied to the EU funds regulatory framework. There is no legal obligation under the current EU funds management regulatory framework (EU funds programming period 2014-2020) and regulatory framework proposal (EU funds

programming period 2021-2027) to publicly disclose the company's registration number, owner and beneficial owner. Nor is there legal obligation to provide information on natural persons using their identification number. Therefore, under the current and proposed regulatory framework there is no possibility to access information on all EU financial support received by a beneficiary as beneficiaries cannot be identified by a unique identifier. It is suggested to amend the CPR proposal and if possible to amend the Financial Regulation, in order to make the information on beneficiary's company's registration number publicly available.

The Financial Regulation sets limits for amounts under which the beneficial information is not to be disclosed, however, the regulatory proposal for the management of EU funds in programming period 2021-2027 does not define a limit. Therefore, there is a possibility to further streamline the regulatory framework and to reduce the disclosure requirements by setting limits under which beneficiary information is not to be disclosed. While setting the disclosure requirements limits for the funding received, also the disclosure requirements for funding received through financial instruments could be developed. At the time being there are no requirements nor guidance regarding information disclosure on financial instruments financed by EU funds, including cases when financial instruments are implemented by commercial banks. The proposed changes would relate to the regulatory framework for the EU funds in programming period 2021-2027. It is suggested to set the minimum amount of data disclosure as it is defined in the Financial Regulation – very low value contracts below EUR 15 000 and in case of financial instruments amounts lower than EUR 500 000

The regulatory framework not only sets out what data needs to be disclosed but also the time frame for the public disclosure of information which varies between different regulatory frameworks. According to the Financial Regulation information should be removed two years after the end of the financial year in which funds were legally committed, while according to the CPR proposal the name and surname of the beneficiary should be removed two years from the date of the initial publication on the website. According to the AML regulatory framework information should be stored for 5 years. It is suggested to streamline the regulatory framework and to make information publicly available for at least 5 years. The proposed changes would relate to the CPR proposal and the Financial Regulation.

The most sensitive part of the information disclosure relates to natural persons. The AML Directive on natural persons requires the disclosure of information that is not disclosed under EU funds management including: name, surname, the month and year of birth, the country of residence and nationality. However it still does not allow to identify a natural person as no identification number is used. No changes are suggested towards natural person's identification number disclosure in order to respect GDPR requirements. However, the proposed changes would relate to streamlining AML and EU funds management regulatory framework by publicly disclosing the following information: name, surname, the month and year of birth, and the country of residence. It is suggested not to disclose nationality under EU funds regulatory framework. In addition, a clearer link could be established between the regulatory framework of EU fund management (on EU and national level) and GDPR by requiring the EU funds beneficiary to give consent to the processing and disclosing of personal information prior to entering the contract. The proposed change would relate to the CPR proposal.

In many cases the information on the beneficiary's location will allow to better identify a beneficiary, but the territorial aspect (NUTS level) is differently defined in the regulatory framework. For instance, in the Financial Regulation the disclosure of NUTS2 level information is required for natural persons, in CAP (Regulation (EU) No 1306/2013) municipality level information is required, while in the CPR (Regulation (EU) No 1303/2013) a postcode. In the CPR proposal the operation location is required for legal persons and NUTS2 level location for natural persons. It is recommended to streamline requirements on territorial information disclosure. The operation location should be required for all

projects as it could be used for the evaluation of the project's impact; and municipality and NUTS2 level information should be requested for beneficiaries.

The EU funds are received by the beneficiaries but, in many cases, the projects are implemented by the project implementers, therefore, for transparency reasons and in order to get an information on final recipients of EU funding, it is suggested to link the beneficiaries' data with data on project implementers and to provide transparency reports on funds received by the project implementers. The proposed changes would relate to the CPR proposal.

#### 4.1.3. Technical aspects of data disclosure

This section focuses on the technical aspects of the data collection and disclosure. It includes a description of different systems developed and used at Member State and EU level.

##### Beneficiaries – Cohesion funds

The European Commission has a common platform for projects financed by ERDF and CF for EU funds programming period 2014-2020<sup>30</sup>, which includes links to the websites managed by the Member States. Member States are responsible for providing information. The information disclosed should include at least the name of beneficiary, the activity and the amount of public funding allocated. The Member State websites and the information included in national project databases are in national languages and, in some cases, summary information is provided in English. There are more than 200 operational programmes (national and regional) for EU funds in the programming period 2014 – 2020<sup>31</sup> and in many cases there are separate project databases for each operational programme.

There is an initiative to have consolidated project information at EU level, including development of a common EU level database with all projects from all Member States.

The main objective of the pilot project by the European Commission on the development of a **common project database** is to use this information for planning, supervising and monitoring purposes. At the beginning of 2021, there is a pilot project including six Member States: Ireland, Denmark, Poland, Czech Republic, Italy and France. The plan is to move from the pilot phase to the main project and the main project to be completed by the end of 2021. The objective is to have the system fully operational for the new Multiannual Financial Framework for the programming period 2021 – 2027. The project will achieve this by standardization of information and data formats used by Member States. The legal basis for information consolidation is Common Provision Regulation EU 1303/2013 (Article 115 and Annex XII). As the database includes several EU funds (ERAF, CF, ESF), more data fields were added including fund, programme name, themes (inferred from the category intervention), programming period, and region (inferred from the programme).

##### Beneficiaries - CAP funds

The European Commission has a common platform providing links to the Member States websites<sup>32</sup>. The content of these websites is the sole responsibility of the Member State concerned. They publish details of the beneficiaries of CAP payments including the name of beneficiary, municipality, the breakdown of the amounts of payments for each individual measure, amount received by the

<sup>30</sup> [https://ec.europa.eu/regional\\_policy/en/atlas/beneficiaries](https://ec.europa.eu/regional_policy/en/atlas/beneficiaries)

<sup>31</sup> [https://ec.europa.eu/regional\\_policy/en/atlas/programmes](https://ec.europa.eu/regional_policy/en/atlas/programmes)

<sup>32</sup> [https://ec.europa.eu/info/food-farming-fisheries/key-policies/common-agricultural-policy/financing-cap/financial-assurance/beneficiaries\\_en](https://ec.europa.eu/info/food-farming-fisheries/key-policies/common-agricultural-policy/financing-cap/financial-assurance/beneficiaries_en)

beneficiary, and description of the measure. After publication, the information is available for two years. The information is made available in national languages and in different data formats.

### **Owners and beneficial owners of the companies**

According to Directive (EU) 2018/843 (AMLD V), Member States should develop central registers in which companies' beneficial ownership information is set out. There must be one national central register per Member State and an interconnection of Member States' central registers holding beneficial ownership information through the European Central Platform. The Commission shall adopt by means of implementing acts technical specifications and procedures necessary to provide for the interconnection of Member States' central registers (see Annex 3).

Member States were required to set up beneficial ownership registers for companies and other legal entities by 10 January 2020 and for trusts and similar legal arrangements by 10 March 2020. Central registers should be interconnected via the European Central Platform by 10 March 2021.

By June 2020<sup>33</sup>, 23 Member States have created central registers of beneficial owners. Some of the registers are publicly available, for instance, Sweden and Denmark. Some registers are not publicly available, for instance, France and Spain. Some Member States have not yet developed registers: Lithuania, Romania, Hungary, and Italy.

### **Project implementers**

Public procurement results are published in the national or regional procurement systems. Above certain limits, national procurement information also is included in TED (Tenders Electronic Daily),<sup>34</sup> which is the online version of the 'Supplement to the Official Journal' of the EU, dedicated to European public procurement.

According to the Public Procurement Directive for each award, the name, the address, the fact that the contract is related to a project financed by EU funds, and other information is to be disclosed. The information is disclosed in the national procurement system, TED, or both. There is no requirement to disclose owner and beneficial owner of the company (award recipient).

#### **4.1.4. Technical barriers to obtaining and disclosing information**

Based on the review of national databases and interviews with different stakeholders, the main technical barriers to obtaining and disclosing information on beneficiaries, project implementers, owners and beneficial owners of the companies are listed below. The technical barriers mainly relate to the data stored in the systems (machine readability, accessibility, findability and reusability), interoperability of systems, data formats, data exchange and storage platforms, ways of granting and managing data access.

An important tool to further improve the transparency of EU funds would be the information included in the national central registers on beneficial owners of companies. However, the information on owners and beneficial owners of companies is not available in the national central registers of all Member States. Even in case this information is recorded in a national central register, not all Member States make the information available to the general public. Therefore, it is important to complete the implementation of the requirements defined in the AMLD V. The Common European Platform to link national central registers on owners and beneficial owners is to be operational by March 2021 and it

---

<sup>33</sup> <https://medium.com/transparent-data-eng/ultimate-beneficial-owners-registers-in-the-eu-2020-5a868e3ff0>

<sup>34</sup> <https://ted.europa.eu/TED/misc/aboutTed.do>

will further support information disclosure not only about beneficiaries in each Member State but also across EU.

An important step to further increase data transparency and beneficiary data consolidation across different funds and different Member States would be the development of a common EU level database for all EU funded projects under ESIF. The European Commission initiated a pilot project and an EU level common database is under development, therefore it is very important to continue this initiative. The main technical challenges in relation to the development of a common EU level project database are: the project information recorded in the national databases of EU funded project is stored in different formats and data fields, and the information is available in national languages. The technical issues could be solved by developing guidelines for the Member States and providing training on these guidelines. There will be many benefits to a common EU level database, including beneficiary data consolidation across different funds and EU Member States, therefore standard reports and data request scenarios could be developed to further enhance transparency.

As stated earlier, EU funds are received by beneficiaries but project implementers can realise the projects financed by EU funds, therefore it is important to collect information not only on beneficiaries of EU financed projects but also on the project implementers. However, there is no automatic link between EU funded project databases and the public procurement databases, where the project implementers' information is published. Therefore an automatic link between those two databases would allow to further improve transparency over the recipients of EU funds.

In addition, there is no automatic link between databases of EU funded projects (EU or national level) and national central registers on owners and beneficial owners of the companies. In order to increase transparency the next step would be to provide the information not only about beneficiaries and project implementers but also the beneficial owners of beneficiaries and project implementers. In order to provide this level of transparency three databases would need to be linked: databases of EU funded projects, national or regional public procurement databases and national central registers on beneficial owners of the companies.

Part of the ESIF funds is implemented by using financial instruments, however there are no requirements regarding information disclosure on financial instruments such as equity or quasi-equity; loan; guarantee; ancillary support. It is recommended to develop data disclosure requirements for financial instruments, for instance, based on the type of financial instrument and amount of financing provided.

#### 4.1.5. Overview of data availability and disclosure for CAP and Cohesion funds

Based on the regulatory framework analysis, a review of EU funded project databases at EU and national level, and interviews with different stakeholders, the overview of the current situation in relation to information disclosure for CAP and Cohesion funds is presented in the table below.

**Table 4.1 Summary of data availability and disclosure**

<b>Data level</b>	<b>Project data / direct beneficiary</b>	<b>Ultimate beneficiary</b>	<b>Project implementer</b>	<b>(Beneficial) owner of the project implementer</b>
<b>Data availability for transparency purposes</b>				
<b>Project or beneficiary level</b>	Project data does not include a unique identifier (company or natural person)	National central register on beneficial owners, not directly linked to databases of EU-funded projects	National public procurement database not directly linked to databases of EU-funded projects	National central register on beneficial owners not directly linked to public procurement database
<b>Aggregated data (beneficiary, owner or beneficial owner)</b>	-	-	-	-
<b>Data availability for audit and control (national and EU level)</b>				
<b>Project or beneficiary level</b>	✓	National central register on beneficial owners, not directly linked to databases of EU-funded projects	National public procurement database not directly linked to databases of EU-funded projects	National central register on beneficial owners not directly linked to public procurement database
<b>Aggregated data (beneficiary, owner or beneficial owner)</b>	Country specific	Country specific	Country specific	Country specific
<b>Data availability for monitoring and evaluation (national and EU level)</b>				
<b>Project or beneficiary level data</b>	National databases of EU-funded projects	Not needed for evaluation	Not needed for evaluation	Not needed for evaluation
<b>Aggregated data (owner or beneficial owner)</b>	Country specific	Not needed for evaluation	Not needed for evaluation	Not needed for evaluation

## 4.2. Possibilities to enhance transparency

In this section several proposals for improvement of the transparency are presented. The proposals are based on the assessment of the current regulatory framework and proposals for new regulatory framework, practices applied by the Member States, EU guidance on GDPR, review of national web pages of databases of EU-funded projects and interviews carried out.

The recommendations are divided between legal and technical aspects, where technical aspects can be addressed at national and EU level.

#### 4.2.1. Common EU funds financed project database

Recommendations listed in the table below relate to a common EU funds financed project database developed at EU level and including EU funded project data from all Member States.

**Table 4.2 Recommendations for creation of common EU funds financing database**

Recommendation	Legal	Technical national level	Technical EU level
<b>Project and beneficiary information</b>			
To develop a common project database at EU level on all projects financed by CF, ESF, EAFRD, EAGF, EMFF and ERDF by all Member States  To make the data available for control and audit purposes (to Member State and EU authorities), for monitoring and evaluation purposes, and for data transparency. To provide data search function for different parameters and standard reports.		√	√
To decide on the data to be disclosed to the general public, for instance, beneficiary, project, project objective, funding received, locality of the project, project implementer, beneficial owner of the beneficiary. For natural persons their name, surname, municipality, year and month of birth.	√	√	√
The information in the database to be open, machine readable, accessible, findable, and re-usable in the format set up by Directive 2019/1024 on Open data	√	√	√
To set common data storage and disclosure requirements in the national EU funded project databases for Member States authorities, for instance, project identifiers, currencies, alphabets, etc.	√	√	√
To set the company registration number or VAT registration number as mandatory information under data transparency.  To obtain and disclose the information on the type of beneficiary, for instance, public authority (national, regional level), NGO, foundation, etc.	√	√	√
To decide whether information should be collected in national languages and machine translated to English or other methods should be applied to ensure that the same database can be used at both national and EU level.	√	√	√
To decide whether data could be downloaded from a common EU database or only viewed by the general public. Data download possibilities to be provided to EU and national authorities.	√	√	√

Recommendation	Legal	Technical national level	Technical EU level
Data to be accessible for at least 5 years for monitoring (audit, control, and transparency) and for an evaluation of a longer period of time.	√		
To consolidate in the analytical reports the information at beneficiary and beneficial owner level under different EU funds at Member State level and EU level. To use the company registration number as a unique identifier to consolidate data at beneficiary level.		√	√

Source: Authors' elaboration.

The recommendations listed above relate to complex action steps including legal and technical issues and some of them have already been started, for instance, the European Commission project on a common EU level database on projects financed by EU funds.

The highest priority could be given to actions related to technical issues at national and EU level. The first priority would be the to continue the work on the development of a common EU level project database including the development of technical guidance and training of Member States authorities.

The development of a common EU level project database could to be linked with the proposed changes to the regulatory framework by defining what type of data from a common EU level project database to be available to the general public for transparency purposes, including the development of standard reports available to the general public. The changes to the regulatory framework could relate to changes to the CPR proposal, for instance Article 44, amending the requirement to include a company registration number or VAT number, a location indicator – NUTS2 and municipality level.

#### 4.2.2. Project implementers, owners and beneficial owners of the companies

The recommendations listed in the table below relate to different aspects of transparency improvement on beneficiaries, beneficial owners, project implementers and their beneficial owners.

**Table 4.3 Recommendations for transparency improvement**

Recommendation	Legal	Technical national level	Technical EU level
<b>Project and beneficiary information</b>			
To harmonise the project and beneficiary data disclosure requirements between EU funds under direct and shared management.	√		
To harmonise the project and beneficiary data disclosure requirements between ERDF, CF, ESF, EAFRD, EAGF, EMFF and the Financial Regulation.	√		
To set the minimum amount for disclosure obligations of beneficiaries receiving small amounts. Possibility to harmonize:	√		

<b>Recommendation</b>	<b>Legal</b>	<b>Technical national level</b>	<b>Technical EU level</b>
reduce or remove the requirement in full or only retain requirement for natural persons.			
To decide whether and under which conditions data is to be disclosed regarding financial instruments, including beneficiaries and beneficial owners.	√		
To inform beneficiaries at the time for funding application about project, beneficiary and beneficial owner data use for control and transparency. Requirements could be included in national legal acts and also in the agreements with beneficiaries.	√		
<b>Beneficial owners</b>			
To streamline information disclosure requirements on beneficial owners between AML regulatory framework, Financial Regulation and EU funds management regulatory framework proposal.	√		
Institutions involved in EU funds management to get access to national central platforms on beneficial owners of the companies.	√		
To complete AML Directives implementation in all Member States by developing national central registers of beneficial owners and integrating national central registers in a common European Central Platform.		√	
<b>Irregularities</b>			
To develop a common system at Member State and EU level to record identified risks and irregularities in relation to EU funds management.			√
To use different data mining and artificial intelligence tools to identify irregularities, for instance, applying those tools to a common database of EU-funded projects at EU level, to develop standard reports.		√	√
<b>Project implementers</b>			
To consolidate at national level the information on project implementers and beneficial owners under different EU programs, including ERDF, CF, ESF, EAFRD, EAGF, EMFF.		√	
To consolidate at EU level the information on project implementers and beneficial owners under different EU programs, including ERDF, CF, ESF, EAFRD, EAGF, EMFF.		√	√
To decide whether an automated link is to be provided between national and regional procurement systems and EU funded project database.	√	√	

Recommendation	Legal	Technical national level	Technical EU level
To decide whether EU funded project implementer data to be automatically linked with national central registers of beneficial owners of the companies.	√	√	

Source: Authors' elaboration.

The suggested steps to improve transparency relate to the long-term objectives and significant changes to the regulatory framework of EU funds management are needed. The streamlining of information disclosure requirements between different EU funds managed under direct and shared management could not be achieved in the short term. The streamlining of the data disclosure requirements under ESIF is achieved by the CPR proposal, however there are different regulatory frameworks for EU funds management under direct management, therefore it will require a longer period of time and many legal changes to streamline the regulatory framework for EU funds management under shared and direct management. A detailed review of the regulatory basis for EU projects under direct management is not subject to this analytical study.

The same issues highlighted above relate to other regulatory framework changes, for instance, the changes to the Financial Regulation where the requirement for company identification via a company registration number could be included, but it should be taken into account that the Financial Regulation covers all aspects of EU budget and changes could be implemented when there is a decision to amend the Financial Regulation.

At the same time there are certain action steps which could be implemented in a shorter time frame. These mostly relate to the technical aspects at Member State level, for instance, identification of risks and irregularities at national level, to use the data mining and artificial intelligence tools and to consolidate information at national level about projects financed by different EU funds.

In addition, amendments could be submitted to the CPR proposal to set the limit under which information does not need to be disclosed, to define the information to be disclosed, the limits for disclosure under financial instruments, the requirements to disclose owners and beneficial owners of the companies and other changes.

## 5. PRELIMINARY CONCLUSIONS AND POLICY RECOMMENDATIONS

### KEY FINDINGS

There are about 292 reporting systems disclosing beneficiary information of CAP and Cohesion Policy. The large majority of the reporting systems meets the legal requirements, nevertheless it is currently difficult to aggregate the beneficiary information. Besides the large number of reporting systems, also the difficulty in determining the overlap, obtaining the data from the reporting systems and differences in disclosed information form major obstacles.

It is currently *de facto* impossible to identify the largest ultimate beneficiaries of EU funds with full confidence. There are many reporting systems that do not include natural person and company identification numbers or other indicators that allow precise identification. Indicators of the types of beneficiaries that allow to identify some ultimate beneficiaries directly are exceptional across the identified reporting systems. The ultimate beneficial ownership information is currently not (publicly) available.

In line with these findings, the main legal barriers are the lack of requirements to disclose indicators that allow the unique identification of natural persons and matching with the ultimate beneficiary ownership databases created according to anti-money laundering (AML) rules.

*Note: this is a pre-release version of the study. The conclusions and policy recommendations may change based on the final results of the research to be presented in the final version.*

### 5.1. Conclusions

This report aimed to identify the largest ultimate beneficiaries of both CAP and Cohesion Policy in the EU27 and the UK based on the existing publicly disclosed direct beneficiary information. This has proved very challenging given primarily the fragmentation of the reporting systems and the limited information allowing to identify ultimate beneficiaries.

In total 292 reporting systems covering the implementation of the CAP and the Cohesion Policy in EU Member States and the UK were identified. Indeed, the CAP beneficiaries are disclosed in 28 central reporting systems at national level. The approximately 5 million direct beneficiaries annually disclosed with the full name, municipality, amount and measure information, could on about half of the reporting systems be downloaded using machine readable spreadsheets. The other half of the reporting systems required web-scraping, which often depended on the search results. These are in a substantial number of reporting systems limited by maximum number of search results, CAPTCHAs, search requirements and limitations in the display of the results. Nevertheless it is possible to gather all or nearly all direct beneficiaries.

For the Cohesion Policy, obtaining the direct beneficiary information from the reporting systems is more straightforward. There are downloadable machine-readable spreadsheets available basically for all the reporting systems. In turn, the information is much more fragmented. There are over 250 reporting systems disclosing direct beneficiaries of the Cohesion Policy. These cover the direct beneficiaries at regional, national, inter-regional and EU level. However, it is not always clear how the platforms relate, partially due to the lack of unique identifiers for OPs and the absence of a single database. According to the analysis conducted, most of the national beneficiaries of Cohesion Policy

are aggregated in at least one central national reporting systems. Nevertheless there are in total six countries offering no central national reporting systems, which requires the collection of information from tens of additional platforms. Notwithstanding these challenges, it proved to be possible to collect all the direct beneficiaries and aggregate the information in a single database.

By contrast, it is currently impossible to obtain a fully accurate list of ultimate beneficiaries of either CAP or Cohesion Policy. The CAP and Cohesion Policy reporting systems are not legally required and also do not contain information on the ultimate beneficiaries. However, about half of the Cohesion Policy reporting systems disclose the national identification number of the beneficiaries, which are unique and perfectly matching, unlike names of natural persons, partnerships or limited liability companies. The identification numbers are available in more reporting systems, but they do not publish this data. Additionally, the reporting systems indicate only in exceptional cases the types of beneficiaries (company, public, natural person, etc.), which would make the identification of ultimate beneficiaries easier. The information on the direct beneficiary information needs to be matched to company databases with ownership information, to determine the ultimate beneficiaries. These databases do not contain accurate and up-to-date ownership information on all companies.

## 5.2. Policy recommendations

To overcome the current fragmentation and challenges in identifying the ultimate beneficiaries of EU funds, both the reporting systems as well as the indicators would have to be reviewed.

The creation of a common database at EU level covering all projects financed by CF, ESF, EAFRD, EAGF, EMFF and ERDF would overcome the fragmentation. There has already been a pilot project initiated to develop a common EU level database on all EU funded projects, which is not publicly disclosed. In order to create a uniform database with all direct beneficiaries, the disclosure requirements need to be harmonised and provided in the same format. This needs to be open, machine readable, accessible, findable, and re-usable, fulfilling the Open data requirements.

A common EU database does not necessarily need to cover ultimate beneficiary information based on information retrieved from the reporting systems, which might be too burdensome to keep up-to-date. The ownership relations can in some cases be quite complex and requiring specific expertise that most payment agencies currently are unlikely to possess. Besides that it might incur additional costs for the payment agencies, the ultimate beneficiary information might be more prone to errors than in the specialised databases. Moreover, the use of the proposed approach will avoid duplication of administrative procedures.

In order to, nevertheless, relatively easily identify the ultimate beneficiaries, it is essential that the common EU database includes the type of beneficiary (especially distinction between company and non-company) and identifiers to link the common EU database to the databases with ultimate beneficiary information. Both the identifiers on the companies and the other organisations should be matched to the unique corporate and natural person identifiers in the newly created databases under the AML legislation (company registration number, VAT registration number, etc.). The type of beneficiary eases the linking/matching as for instance natural persons can only be ultimate beneficiary owner and not a company, while companies can be both. The type of beneficiary is for some types already sufficient to identify the ultimate beneficiaries.

There is also a need to define obligations concerning the minimum disclosure amounts for Cohesion Policy, to avoid complete anonymization. Expanding the disclosure period for CAP from 2 to at least 5

years would allow sufficient time for audit, control, and public scrutiny. To protect the privacy of the beneficiaries, they should be informed at the time of their application for funding about the use of project, beneficiary and beneficial owner data for control and transparency purposes.

## ANNEX 1. SCORE CARD

Indicator	Categories	Comment
General information		
Name		
Organisation responsible		
Type	Government agency/Ministry/Other (specify)	
Country		
Website		
Type of funds covered	CAP/Cohesion Policy	
Type of funds covered (detailed)	CAP: (EAGF / EAFRD) Cohesion policy: (ERDF, CF)	
Does the database cover additional policies besides the CAP/Cohesion Policy	No, Common Fisheries Policies, Other (specify)	
Language (more than one possible)	BG, ES, CS, DA, DE, ET, EL, EN, FR, GA, HR, IT, LV, LT, HU, MT, NL, PL, PT, RO, SK, SL, FI, SV, Other (please specify)	According to the CAP Implementing Act the information should be reported in the official language of the Member State and or at least one of the working languages of the Commission (DE, FR, EN).  Cohesion funds in one official language of the Member State
Currency (more than one possible)	EUR, BGN, CZK, DKK, HRK, HUF, PLN, RON, SEK, GBP, Other (please specify)	According to the CAP Implementing Act the amounts should be reported in the national currencies. No indication for Cohesion funds.
Years covered	2019, 2018, 2017, 2016, 2015, Other	According to the CAP Regulation should the websites cover 2 years of information for the CAP.
Years covered in single database	Yes / No / Unclear (specify)	
Format	Web-based/Excel/Other (specify)	
Name of evaluator (CEPS)		
Date of obtaining the information		
Data provided		<i>Anonymised answers under the CAP will be excluded in the assessment of the compliance in line with the CAP Regulation and Implementing Act</i>
Name		<i>No obligation for structural funds.</i>
First name and the surname (natural person)	Non-compliant	Neither the first nor the surname are provided [e.g. initials instead of full name] (<5%)
	Partially compliant	Full first name and surname are only provided for some (5-50%)
	Largely compliant	Full first name and surname are provided for most (50-95%)

Indicator	Categories	Comment
	Compliant	Full first name and surname are provided for all (>95%) [e.g. initials instead of full name]
	Not applicable	No natural persons among the beneficiaries
Full legal name as registered (legal person with the autonomous legal personality)	Non-compliant	Similar to the above
	Partially compliant	
	Largely compliant	
	Compliant	
	Not applicable	
Full name of the association as registered or otherwise officially recognised (association without an own legal personality)	Non-compliant	Similar to the above
	Partially compliant	
	Largely compliant	
	Compliant	
	Not applicable	
Address		
Municipality name (resident / registered)	Non-compliant	Similar to the above
	Partially compliant	
	Largely compliant	
	Compliant	
	Not applicable	
Postal code	Non-compliant	Similar to above - Only required according to the CAP Regulation when available.
	Partially compliant	
	Largely compliant	
	Compliant	
	Not applicable	
Province	Non-compliant	Not required according to the CAP Regulation
	Partially compliant	
	Largely compliant	
	Compliant	
	Not applicable	
Country	Non-compliant	Required for Cohesion funds
	Partially compliant	
	Largely compliant	
	Compliant	
	Not applicable	
Funds paid		
Funds by measure and beneficiary	Yes / No / Unclear (specify)	
Funds by fund and beneficiary	Yes / No / Unclear (specify)	
Funds by beneficiary	Yes / No / Unclear (specify)	
Funds by beneficiary provide both total and amounts by measure	Yes / No / Unclear (specify)	Not required according to the CAP Regulation.
Funds financed by EAFRD include both EU and national contributions (CAP only)	Yes / No / Unclear (specify)	

Indicator	Categories	Comment
Total eligible expenditure allocated to the operation	Yes / No / Unclear (specify)	Required for Cohesion funds
Union co-financing rate, as per priority axis	Yes / No / Unclear (specify)	Required for Cohesion funds
Operation		Exclusively for Cohesion funds
Operation name	Yes / No / Unclear (specify)	
Operation summary	Yes / No / Unclear (specify)	
Operation start date	Yes / No / Unclear (specify)	
Operation end date	Yes / No / Unclear (specify)	
The headings of the data fields shall be provided in at least one other official language of the Union.	Yes / No / Unclear (specify)	
Measures financed		
Description of the measure financed	Yes / No / Unclear (specify)	
	Full name / Acronym / Number of measure / Other (specify)	
Identifiers		
Does the database provide any identification numbers?	Yes / No / Unclear (specify)	Not required according to the CAP Regulation and Implementing Act.
	VAT Number / ID Number / Registration Number / Other (specify)	
Other indicators		
Are there any other indicators included in the database?	Yes (specify) / No / Unclear (specify)	
Sorting offered		Not required according to the CAP Regulation and Implementing Act.
Sorting offered	Yes, on all entries / Yes, on search results / Yes, other (specify) / No / Unclear (specify)	
Name	Yes / No / Unclear (specify)	
Municipality	Yes / No / Unclear (specify)	
Postal code	Yes / No / Unclear (specify)	
Province	Yes / No / Unclear (specify)	
Measure	Yes / No / Unclear (specify)	
Fund	Yes / No / Unclear (specify)	
Amount	Yes / No / Unclear (specify)	
Searching possibilities offered		
Name	Yes, both exact and partial / Yes, dropdown / Yes, multiple choice / Yes, only exact / Yes, only partial / Yes, other (specify) / No / Unclear (specify)	CAP Implementing Act requires search tool with at least either name, municipality or amount searchable.
Municipality	Yes, both exact and partial / Yes, dropdown / Yes, multiple choice / Yes, only exact / Yes, only partial / Yes, other (specify) / No / Unclear (specify)	CAP Implementing Act requires search tool with at least either name, municipality or amount searchable.

Indicator	Categories	Comment
Postal code	Yes, both exact and partial / Yes, dropdown / Yes, multiple choice / Yes, only exact / Yes, only partial / Yes, other (specify) / No / Unclear (specify)	Not required according to the CAP Regulation and Implementing Act.
Province	Yes, both exact and partial / Yes, dropdown / Yes, multiple choice / Yes, only exact / Yes, only partial / Yes, other (specify) / No / Unclear (specify)	Not required according to the CAP Regulation and Implementing Act.
Measure	Yes, both exact and partial / Yes, dropdown / Yes, multiple choice / Yes, only exact / Yes, only partial / Yes, other (specify) / No / Unclear (specify)	Not required according to the CAP Regulation and Implementing Act.
Fund	Yes, both exact and partial / Yes, dropdown / Yes, multiple choice / Yes, only exact / Yes, only partial / Yes, other (specify) / No / Unclear (specify)	Not required according to the CAP Regulation and Implementing Act.
Amount	Yes / No / Unclear (specify) Exact amount / Min / Max / All / Range	CAP Implementing Act requires search tool with at least either name, municipality or amount searchable.
Anonymization		
Minimum annual threshold for publication of funds	[Amount] / Not applicable	
Are the anonymised natural persons included in the overview?	Yes/No/Unclear (specify)	
Are the anonymised natural persons indicated with a code?	Yes/No/Unclear (specify)	
Data protection/Privacy		Not required according to the CAP Regulation and Implementing Act.
Description of data processing in connection with data protection legislation	Yes/No/Unclear (specify)	
Link to data protection authority	Yes/No/Unclear (specify)	
Does the website provide a clear indication about the applicable licensing rules?	Yes (specify)/No/Unclear (specify)	<i>Required for Cohesion funds only</i>
Accessibility		Not required according to the CAP Regulation and Implementing Act.
Does the website provide any tools to ease the use of the database and the included data?	No/Manual/Glossary/Other (specify)	
Does the website offer the possibility to download the data?	Yes (full – specify), Yes (partially – specify), No Excel, CSV, DTA, Other (specify)	

Indicator	Categories	Comment
Does the website provide a list of operations by operational programme and by Fund? [Cohesion funds only]	Yes/No/Unclear (specify)	
Does the website provide information about all operational programmes in the Member State? [Cohesion funds required]	Yes/No/Unclear (specify)	
Contact possibility		Not required according to the CAP Regulation and Implementing Act.
Email address or contact form	Yes/No/Unclear (specify)	
Phone-number	Yes/No/Unclear (specify)	
EU funding		
Is the EU emblem visible on the website? [Cohesion funds required]	Yes/No/Unclear (specify)	
Is the EU emblem the largest logo on the website? [Cohesion funds required]	Yes/No/Unclear (specify)	
Is there a need to scroll down the page? [Cohesion funds required]	Yes/No/Unclear (specify)	
Is there a reference to the relevant fund included? [Cohesion funds required]	Yes/No/Unclear (specify)	
Other information		Not required according to the CAP Regulation and Implementing Act.
Does the website provide an overview of the total funds paid?	Yes (total only)/Yes (total and by segment)/Yes (other – specify)/No/Unclear (specify)	
Does the website provide any other information related to the CAP or Cohesion funds	Yes (specify)/No/Unclear (specify)	
How frequently is the data updated? [Cohesion funds only]		<i>Minimum every six months</i>
Date of last update of the list of operations: [Cohesion funds required]	Date	

For the assessment of the reporting systems (see Chapter 3) both the website in the national language as well as Commission working language were considered. Moreover, only the part of the website that covers the database will be considered when the database forms part of a website with other information.

## ANNEX 2. INTERVIEW GUIDE

### Introduction

Thank you for taking the time to participate in this interview on the control and transparency of the Common Agricultural Policy (CAP) and Structural Funds beneficiaries. Both areas represent the two largest EU spending areas. In 2020, more than two-thirds of the commitments and payments are for economic, social and territorial cohesion policies and the CAP.

This interview will provide input for the assessment of the current control and transparency of the beneficiary information and potential for improvement. Under the service contract “the largest 50 beneficiaries in each EU member state of cap and Cohesion funds” (IP/D/ALL/FWC/2020-001), this study aims at:

- Providing a concrete list of the largest 50 beneficiaries (as natural person) in each EU Member State of CAP and Cohesion funds;
- Assess the systems that have been set up at EU and Member State level to identify receivers and end beneficiaries of funds;
- Provide an overview of data protection regulations or other regulations that might prevent that data concerning payments to companies and natural persons are made public and/or are given to authorities responsible for insuring the sound management of EU funds; and
- Come up with proposals for improvements to the present set of rules and regulations and the existing systems in order to increase transparency and accountability concerning funds being paid out in support of the EU’s Common Agricultural Policy and the structural funds.

The objective of this interview is to collect views on the current transparency practices and possibilities to improve the transparency.

The data of this interview are treated according to GDPR policy. No personal information will be shared, published or kept for longer than the study period. All responses will be assessed and treated anonymously.

In case of any unclarities or questions, please do not hesitate to contact the project coordinator for this interview (NAME - EMAIL).

### About interviewer

1. Name:
2. Interview date:

### About interviewee

3. First name:

5. E-mail address:
6. Name of organization:
7. Country:
8. Type of interview (phone/video/physical):

## Identifying elements for identification of best practice(s)

9. To what extent are the following elements important for transparency and accountability of the CAP and Cohesion funds? Please note if you see a difference between CAP and Cohesion funds.

	Not at all important	Slightly important	Moderately important	Very important	Extremely important	DK/NA
National language (web page and beneficiary database)						
English (web page and beneficiary database)						
Other foreign languages (web page and beneficiary database)						
Collection in single database (instead of one database for each year / different types of projects)						
Name of beneficiary						
Address of beneficiary						
Details on funds paid						
Identifiers (registration number, etc.)						
Ability to sort information (per fund, per specific support measure, etc.)						
Ability to search the information						
Publication of receivers of small amounts						
Explanation on data process and appeal to data protection						
Tools to ease the use of the database (glossary, manual, etc.)						
Ability to download the data						
Contact responsible authority						
Overview of the total funds paid (key information)						
<i>Other (please specify)</i>						
..						
..						

Please elaborate

10. The standardisation of which of the above mentioned element(s) would benefit the transparency and accountability of the CAP and Cohesion funds across the EU most?
11. To what extent could standardisation benefit the transparency and accountability of the CAP and Cohesion funds across the EU?
12. Are there any (national) specificities that should be considered would the national databases be standardized?

## Existing legal barriers

13. To what extent is the EU legislation limiting the possibility to publish information on beneficiaries? (e.g. full identification of natural persons via personal identification number which is considered as confidential information under GDPR by some of the Member States) (Provide legislation, motivation for the barrier, difference across funds, differences across types of receivers).
14. To what extent is the EU legislation limiting the possibility to exchange information with EU institutions (CAP regulation, GDPR, etc.)? (Provide legislation, motivation for the barrier, difference across funds, differences across types of receivers).
15. To what extent is the national legislation limiting the possibility to publish information (CAP regulation, GDPR, etc.)? (Provide legislation, motivation for the barrier, difference across funds, differences across types of receivers).
16. To what extent is the national legislation limiting the possibility to exchange information with EU institutions (CAP regulation, GDPR, etc.)? (Provide legislation, motivation for the barrier, difference across funds, differences across types of receivers).

## Changes to transparency rules

17. What are your views about the following changes to enhance the transparency about EU financial support receivers - beneficiaries?

	Strongly agree	Agree	Neutral	Disagree	Strongly disagree	DK/NA
To harmonise the requirements for information disclosure about beneficiaries between EU funds under direct and shared management						
To harmonise the requirements for information disclosure about beneficiaries between different EU funds – ERDF, CF, ESF, EAGF, EAFRD and EMFF. Harmonisation includes the information to be disclosed and the period for data disclosure						
To provide not only information on the immediate beneficiaries but also the ultimate beneficiaries						
To expand the information provided in the database, including:						
<ul style="list-style-type: none"> <li>National registration number to ease the identification of companies, public bodies and/or natural persons;</li> </ul>						
<ul style="list-style-type: none"> <li>Type of beneficiary;</li> </ul>						
To extend the disclosure period beyond the current two years period for CAP funds (Expanding the disclosure period based on the current disclosure practices or with anonymisation of the natural persons receiving funds)						
To complement the current disclosure at national level with centralised database at EU-level						
To have a more harmonised or prescriptive presentation of the information.						
Other (please specify)						
..						
..						

Please elaborate your replies

## ANNEX 3. LEGAL FRAMEWORK

### Data on beneficiaries - Financial Regulation

According to Article 38 of the Regulation (EU, Euratom) 2018/1046<sup>35</sup> (Financial Regulation) the European Commission shall make available, in an appropriate and timely manner, information on recipients of funds financed from the budget. The following information shall be published:

- Name of the recipient (for prizes, grants and contracts which have been awarded as a result of contests, grant award procedures or procurement procedures, and for experts selected);
- Locality of the recipient, namely:
  - the address of the recipient when the recipient is a legal person;
  - the region on NUTS 2 level when the recipient is a natural person;
- Amount legally committed;
- Nature and purpose of the measure.

The Article 38 (3) of the Financial Regulation defines exemptions when the name of the recipient shall not be published:

- Education supports paid to natural persons and other direct support paid to natural persons most in need (study, research, training or education support paid to natural persons; direct support paid to natural persons most in need, such as unemployed persons and refugees);
- Very low value contracts awarded to remunerated experts as well as very low value contracts below EUR 15 000;
- Financial support provided through financial instruments for an amount lower than EUR 500 000;
- Where disclosure risks threatening the rights and freedoms of the persons or entities concerned as protected by the Charter of Fundamental Rights of the European Union or harming the commercial interests of the recipients.

Where personal data are published, the information shall be removed two years after the end of the financial year in which the funds were legally committed. This shall also apply to personal data referring to legal persons whose official name identifies one or more natural persons.

The scope of the study includes financing received by beneficiaries in the time period before 2018, therefore the requirements included in the previous Financial Regulation also were assessed. According to the Article 35 of the Financial Regulation (EU, EURATOM) No 966/2012<sup>36</sup>, the European Commission shall make available, in an appropriate and timely manner, information on recipients, as well as the nature and purpose of the measure financed from the budget, and information on recipients as provided by the entities, persons and Member States to which budget implementation tasks are entrusted under other methods of implementation. This information shall be made available with due observance of the requirements of confidentiality and security, in particular the protection of personal data. Where natural persons are concerned, the publication shall be limited to the name and locality of the recipient, the amount awarded and the purpose of the award. The disclosure of those data shall be based on relevant criteria such as the periodicity of award, or the type or importance of the award. The

---

<sup>35</sup> <https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=CELEX%3A32018R1046>

<sup>36</sup> <https://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=OJ:L:2012:298:0001:0096:EN:PDF>

criteria for disclosure and the level of detail published shall take into account the specificities of the sector and of each method of implementation.

The current and previous Financial Regulation require **to disclose the name and locality** of the EU funds recipient. The Financial Regulation also highlights situations when information is not to be disclosed, for instance when the amount of funds received is below a certain limit. However, the information disclosure requirements included in the Financial Regulation **do not require a unique identification number for natural persons**, for instance, by providing personal identification numbers. The Financial Regulation **does not require disclosing the owner and the beneficial owner of the company**.

#### Data on beneficial owners – 4th Anti-Money Laundering Directive

The Directive (EU) 2015/849<sup>37</sup> (4<sup>th</sup> AML Directive) on the prevention of the use of the financial system for the purposes of money laundering or terrorist financing requires to make registers of ultimate beneficiary owners of the companies. According to Article 30, Member States shall ensure that corporate and other legal entities incorporated within their territory are required to obtain and hold adequate, accurate and current information on their ultimate beneficial ownership, including the details of the ultimate beneficial interests held. Member States shall require that the information can be accessed in a timely manner by competent authorities. Access to the information on beneficial ownership shall be in accordance with the data protection rules.

#### Data on beneficial owners – 5th Anti-Money Laundering Directive

The Directive EU 2015/849 sets out the requirements for Member States to collect information on ultimate beneficial ownership, while the Directive 2018/843 (the 5<sup>th</sup> AML Directive) places an emphasis on data availability on ultimate beneficial ownership to any member of general public.

According to the Directive (EU) 2018/843<sup>38</sup> (recital 33), Member States should allow access to beneficial ownership information on corporate and other legal entities in a sufficiently coherent and coordinated way, through the central registers in which beneficial ownership information is set out, by establishing a clear rule of public access, so that third parties are able to ascertain, throughout the Union, who are the beneficial owners of corporate and other legal entities.

Recital (35) - the information on beneficial ownership remains available through the national registers and through the system of interconnection of registers for a minimum of five years. It should also be possible for Member States to require online registration in order to identify any person who requests information from the register, as well as the payment of a fee for access to the information in the register.

Recital (37) – there must be an interconnection of Member States' central registers holding beneficial ownership information through the European Central Platform

Recital (38) - Regulation (EU) 2016/679 of the European Parliament and of the Council (10) applies to the processing of personal data under this Directive. As a consequence, natural persons whose personal data are held in national registers as beneficial owners should be informed accordingly.

Article 5 - Member States shall ensure that the information on the beneficial ownership is accessible in all cases to: a) competent authorities and Financial Intelligence Units, without any restriction; b) obliged

<sup>37</sup> <https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=CELEX%3A32015L0849>

<sup>38</sup> <https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=CELEX%3A32018L0843>

entities, within the framework of customer due diligence; c) any member of the general public. The persons referred to in point (c) shall be permitted to access at least the name, the month and year of birth and the country of residence and nationality of the beneficial owner as well as the nature and extent of the beneficial interest held.

### **Ultimate beneficial owners register – Directive (EU) 2018/843**

According to the Directive (EU) 2018/843 (recital 38) once the interconnection of Member States' beneficial ownership registers is in place, both national and cross-border access to each Member State's register should be granted.

Article 31 - the Commission shall adopt by means of implementing acts technical specifications and procedures necessary to provide for the interconnection of Member States' central registers. The amendments to Directive (EU) 2015/849 should be transposed by 10 January 2020. Member States should set up beneficial ownership registers for corporate and other legal entities by 10 January 2020 and for trusts and similar legal arrangements by 10 March 2020. Central registers should be interconnected via the European Central Platform by 10 March 2021.

Article 65 – starting from 11 January 2022, an analysis of feasibility of specific measures and mechanisms at European Union and Member State level on the possibilities to collect and access the beneficial ownership information of corporate and other legal entities incorporated outside of the Union should be reported.

By June, 2020<sup>39</sup> already 23 Member States have created central register of ultimate beneficial owners. Some of the registers are publicly available, for instance, Sweden, Denmark; some registers are not publicly available, for instance, France, Spain; some Member States have not yet developed registers: Lithuania, Romania, Hungary and Italy.

Member States are required to collect information on beneficial owners on all companies and access to this information shall be granted in accordance with data protection rules (the fourth AML Directive). According to the fifth AML Directive, some information on the ultimate beneficial owners of the companies should be available to the general public, including name, month and year of birth, country of residence and nationality. Not all Member States have developed beneficial owners' registers yet. Moreover, the data exchange between Member States national registers of ultimate beneficial owners and common EU platform will be implemented this year (2021). Natural person identification numbers are not used to identify beneficial owners.

### **EU list of non-cooperative jurisdictions for tax purposes**

The Council, at its meeting on 5 December 2017, endorsed the 'EU list of non-cooperative jurisdictions for tax purposes'<sup>40</sup>. The list is updated on a regular basis and could be considered when analysing company's and beneficial owners' data.

### **Personal data protection (GDPR Regulation)**

Data transparency and disclosure of natural persons data is based on the Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing

<sup>40</sup> <https://data.consilium.europa.eu/doc/document/ST-6237-2018-REV-4/en/pdf>

Directive 95/46/EC (GDPR)<sup>41</sup>. The GDPR has been directly applicable to all Member States since 25 May 2018<sup>42</sup>.

According to the Article 4 of the GDPR 'personal data' is data allowing to identify natural persons in particular by reference to an identifier such as name, identification number, location data and an online identifier. In addition, for the identification of natural persons the important aspect is personal data processing (Article 6 of the GDPR): "it is lawful if the data subject has given consent to the processing of his or her personal data for one or more specific purposes; processing is necessary for the performance of a contract to which the data subject is party or in order to take steps at the request of the data subject prior to entering into a contract".

According to the explanations provided by the European Commission<sup>43</sup>, personal data is any information that relates to an identified or identifiable living natural person. Different pieces of information, which collected together can lead to the identification of a particular natural person, also constitute personal data. Examples of personal data: first name and surname, home address, e-mail address, an identification card number, location data, etc.

The Financial Regulation requires disclosing the following data: name and locality of recipient which according to GDPR is defined as personal data.

## Public procurement

Public procurement rules are set by the Directive (EU) 2014/24<sup>44</sup>. EU countries had until April 2016 to transpose the Directive procurement rules into national law and e-procurement rules by October 2018. According to the Directive (EU) 2014/24 for each award the following information has to be disclosed: name, address including NUTS code, telephone, fax number, email address, and information whether the contract is related to a project and/or programme financed by European Union funds.

Public procurement results are published in one or several national e-procurement systems<sup>45</sup> and above certain limit also in TED (Tenders Electronic Daily)<sup>46</sup> which is the online version of the 'Supplement to the Official Journal' of the EU, dedicated to European public procurement.

According to the Public Procurement Directive for each award grant the following information needs to be disclosed: name, address, whether the contract is related to a project financed by EU funds. There is no requirement to disclose owner and ultimate beneficial owner of the company (award recipient).

## ANNEX 4. PERSONAL DATA DISCLOSURE UNDER EU FUNDS DIRECT MANAGEMENT

### Financial Transparency System

Financial Transparency System (FTS)<sup>47</sup> is used to store data about projects and beneficiaries under EU funds direct management. Information<sup>48</sup> on EU grant, prize, financial instrument, budget support recipients and contractors (public procurement, external experts)<sup>49</sup> is shared via Financial Transparency System, however, the database only includes beneficiaries of funding from the EU budget implemented directly by the European Commission and other EU bodies (for instance, executive agencies), as well as beneficiaries of European Development Fund.

FTS data include country, year, responsible service/department, programme/action type, grant or contract, recipients name (beneficiary can be searched by VAT number but VAT number is not disclosed on the screen, beneficiary name provided in the national language), recipients type (National Focal Point Officer or NGO), number of commitments, estimated amount, committed total amount.

FTS is used to record information about beneficiaries under EU funds direct management. FTS includes only company data and there is no information on owners and ultimate beneficial owners of the companies.

### Natural Person Legal Entity and Private Body Legal Entity Form

The Legal Entity Forms (LEFs) for Private Law Body and Natural Person<sup>50</sup> are used by the European Commission to launch the awarding procedures for a contract or subvention, and the general conditions for low value procurement contracts.

The LEF for Natural Persons includes first name, surname, date of birth, type of identity document (e.g. identity card, passport, drivers licence, other), issuing country, identity document number, permanent private address, private phone, private e-mail and other private data. In addition, if the natural person owns a business without a separate legal personality, the following data on business need to be disclosed: organisation name, VAT number, registration number, place of registration. It should be noted that 8 out of 27 Member States do not use a personal identification number<sup>51</sup>, therefore it is difficult to identify the natural person as passport number and drivers licence number can change.

The Private Law Body Legal Entity Form (PBLEF)<sup>52</sup> includes official name, legal form, main registration number, place of registration, date of registration, VAT number and address of head office. All Member States have unique registration number for companies.

The LEF for Natural Persons used by the European Commission includes personal data, for instance, name, identification number, e-mail address, personal phone. 8 out of 27 Member States do not use a personal identification number allowing to identify natural persons with complete certainty. Personal data is collected as part of EU funds direct management but **personal data is not publicly disclosed**.

The PBLEF includes company information, for instance, legal name and registration number, but there is no information on owner and beneficial owner of the company.

## ANNEX 5. PERSONAL DATA DISCLOSURE UNDER EU FUNDS SHARED MANAGEMENT EU FUNDS PROGRAMMING PERIOD 2014- 2020

### Personal data disclosure for direct payments under Common Agriculture Policy in EU funds programming period 2014-2020

The extracts from the Regulation (EU) No 1307/2013<sup>53</sup> on beneficiary data disclosure requirements are provided in the table below.

Reference	Requirement
Article 67	<p><i>Notification requirements</i></p> <p>In order to ensure the correct application of the rules set out in this Regulation, the Commission shall be empowered to adopt delegated acts on the necessary measures regarding notifications to be made by Member States to the Commission for the purposes of this Regulation, for the purpose of checking, controlling, monitoring, evaluating and auditing direct payments or for the purpose of complying with requirements laid down in international agreements which have been concluded by a Council decision, including notification requirements under those agreements. In so doing, the Commission shall take into account the data needs and synergies between potential data sources. Where appropriate, the information obtained may be transmitted or be made available to international organisations and the competent authorities of third countries and may be made public, subject to the protection of personal data and the legitimate interest of undertakings in the protection of their business secrets.</p>
Article 68	<p><i>Processing and protection of personal data</i></p> <p>Member States and the Commission shall collect personal data for the purposes set out previously. They shall not process this data in a way that is incompatible with those purposes. Where personal data are processed for monitoring and evaluation purposes as referred to in Article 67, they shall be made anonymous and processed in aggregated form only.</p> <p>Personal data shall not be stored in a form which permits identification of data subjects for longer than is necessary for the purposes for which they were collected or for which they are further processed, taking into account the minimum retention periods laid down in the applicable national and Union law. Member States shall inform the data subjects that their personal data may be processed by national and Union bodies, and that in this respect they enjoy the rights. Article 68 is subject to Articles 111 to 114 of Regulation (EU) No 1306/2013<sup>54</sup> (Chapter IV, Transparency).</p>

<sup>53</sup> <https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=celex:32013R1307>

<sup>54</sup> <https://eur-lex.europa.eu/legal-content/en/ALL/?uri=CELEX%3A32013R1306>

The extracts from the Regulation (EU) No 1306/2013<sup>55</sup> on beneficiary data disclosure requirements are provided in the table below.

Reference	Requirement
Article 111	<p><i>Publication of beneficiaries</i></p> <p>Member States shall ensure annual ex-post publication of the beneficiaries of the Funds. The publication shall contain:</p> <p>The first name and the surname where the beneficiary is a natural person, the full legal name as registered where the beneficiary is a legal person with the autonomous legal personality pursuant to the legislation of the Member State concerned, the full name of the association as registered or otherwise officially recognised where the beneficiary is an association without an own legal personality.</p> <p>The municipality where the beneficiary is resident or is registered and, where available, the postal code or the part thereof identifying the municipality.</p> <p>The amounts of payment corresponding to each measure financed by the Funds received by each beneficiary in the financial year concerned.</p> <p>The nature and the description of the measures financed by either of the Funds and under which the payment referred is awarded.</p> <p>The information referred to in the first subparagraph shall be made available on a single website per Member State. It shall remain available for two years from the date of the initial publication.</p>
Article 112	<p><i>Threshold</i></p> <p>Member States shall not publish the name of a beneficiary as provided for in point (a) of the first subparagraph of Article 111(1) of this Regulation in the following situations:</p> <p>(a) in the case of Member States establishing the Small farmers scheme provided for in Title V of Regulation (EU) No 1307/2013, where the amount of aid received in one year by a beneficiary is equal to or less than the amount fixed by the Member State as referred to in the second subparagraph of Article 63(1) or the second subparagraph of Article 63(2) of that Regulation;</p> <p>(b) in the case of Member States not establishing the Small farmers scheme provided for in Title V of Regulation (EU) No 1307/2013, where the amount of aid received in one year by a beneficiary is equal to or less than EUR 1 250.</p>
Article 113	<p><i>Information of the beneficiaries</i></p> <p>Member States shall inform the beneficiaries that their data will be made public and that the data may be processed by auditing and investigating bodies of the Union and the Member States for the purpose of safeguarding the Union's financial interests</p> <p>In accordance with the requirements of Directive 95/46/EC, where personal data is concerned, the Member States shall inform the beneficiaries of their rights under the data protection rules and of the procedures applicable for exercising those rights</p>

<sup>55</sup> <https://eur-lex.europa.eu/legal-content/en/ALL/?uri=CELEX%3A32013R1306>

Under the reporting requirements for **CAP**, **natural persons** are **identified only by name, surname and municipality** where the beneficiary is resident, therefore under the current regulatory framework it is not possible to identify the natural person with complete certainty if the **person identification number is not provided**.

A company is identified only by the company name and **no information on the company registration number, owner and ultimate beneficiary is provided**.

### Personal data disclosure for ERDF, ESF, CF, EAFRD, EMFF in EU funds programming period 2014-2020

The extracts from the Regulation (EU) No 1303/2013<sup>56</sup> on beneficiary data disclosure requirements are provided in the table below.

Reference	Requirement
Article 115	<p><i>Information and communication</i></p> <p>Member States and managing authorities shall be responsible for:</p> <ul style="list-style-type: none"> <li>• drawing up communication strategies;</li> <li>• ensuring the establishment of a single website or a single website portal providing information on, and access to, all operational programmes in that Member State, including information about the timing of implementation of programming and any related public consultation processes;</li> <li>• informing potential beneficiaries about funding opportunities under operational programmes;</li> <li>• publicising to Union citizens the role and achievements of cohesion policy and of the Funds through information and communication actions on the results and impact of Partnership Agreements, operational programmes and operations.</li> <li>• Member States or managing authorities shall, in order to ensure transparency concerning support from the Funds, maintain a list of operations by operational programme and by Fund in a spreadsheet data format, which allows data to be sorted, searched, extracted, compared and easily published on the internet, for instance in CSV or XML format. The list of operations shall be accessible through the single website or the single website portal providing a list and summary of all operational programmes in that Member State.</li> <li>• In order to encourage the use of the list of operations subsequently by the private sector, civil society or national public administration, the website may clearly indicate the applicable licensing rules under which data are published.</li> <li>• The list of operations shall be updated at least every six months.</li> </ul>

<sup>56</sup> <https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=celex%3A32013R1303>

Reference	Requirement
Annex XII	<p>The list of operations referred to in Article 115(2) shall contain, in at least one of the official languages of the Member State, the following data fields:</p> <p>Beneficiary name (only of legal entities, no natural persons shall be named; operation name; operation summary; operation start date; operation end date (expected date for physical completion or full implementation of the operation); total eligible expenditure allocated to the operation; union co-financing rate as per priority axis; operation postcode; or other appropriate location indicator; country; name of category of intervention for the operation; date of last update of the list of operations.</p>

Common Provisions Regulation **does not require** to disclose a company identification number, name of natural person, project implementer, owner and beneficial owner of the company.

Regulation (EU) No 1301/2013 of the European Parliament and of the Council of 17 December 2013 on the European Regional Development Fund and on specific provisions concerning the Investment for growth and jobs goal and repealing Regulation (EC) No 1080/2006.<sup>57</sup>

The ERDF Regulation **does not put any requirements** regarding collection and disclosure of ultimate beneficiary data.

Regulation (EU) No 1299/2013<sup>58</sup> of the European Parliament and of the Council of 17 December 2013 on specific provisions for the support from the European Regional Development Fund to the European territorial cooperation goal.

The ETC regulation **does not require the** collection and disclosure of beneficiary data.

Regulation (EU) No 1304/2013<sup>59</sup> of the European Parliament and the Council of 17 December 2013 on the European Social Fund and repealing Council Regulation (EC) No 1081/2006.

The ESF Regulation **does not require the** collection and disclosure of beneficiary data.

Regulation (EU) No 1300/2013<sup>60</sup> of the European Parliament and of the Council of 17 December 2013 on the Cohesion Fund and repealing Council Regulation (EC) No 1084/2006.

The CF Regulation **does not require the** collection and disclosure of beneficiary data.

The extracts from the Regulation (EU) No 508/2014<sup>61</sup> on beneficiary data disclosure requirements are provided in the table below.

<sup>57</sup> <https://eur-lex.europa.eu/legal-content/en/TXT/?uri=CELEX%3A32013R1301>

<sup>58</sup> <https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=CELEX%3A32013R1299>

<sup>59</sup> <https://eur-lex.europa.eu/legal-content/en/TXT/?uri=CELEX%3A32013R1304>

<sup>60</sup> <https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=CELEX%3A32013R1300>

<sup>61</sup> <https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=CELEX%3A32014R0508>

Reference	Requirement
Article 110	<p><i>Electronic information system</i></p> <p>Key information on the implementation of the operational programme, on each operation selected for funding, as well as on completed operations, needed for monitoring and evaluation, including the key characteristics of the beneficiary and the project, shall be recorded and maintained electronically.</p>
Article 111	<p><i>Provision of information</i></p> <p>Beneficiaries of support under EMFF, including FLAGs, shall undertake to provide to the managing authority and/or to appointed evaluators or other bodies to which the performance of functions on its behalf is delegated, all the data and information necessary to permit monitoring and evaluation of the operational programme, in particular in relation to meeting specific objectives and priorities.</p>
Article 119	<p><i>Information and publicity</i></p> <p>Publicising to Union citizens the role and achievements of the EMFF through information and communication actions on the results and impact of partnership agreements, operational programmes and operations</p>
Annex 5	<p><i>List of operations</i></p> <p>Beneficiary name (only legal entities and natural persons in accordance with national law), operation name, Community fleet register, operation postcode, country</p>

The EMFF Regulation requires to disclose **beneficiary name but only in accordance with national law**. Under the reporting requirements for EMFF the natural persons are identified only by first name, surname and postcode, therefore under the current regulatory framework it is not possible to identify the natural person with complete certainty as no person identification number is provided.

A company is identified only by the company name and **no information on the registration number, owners and ultimate beneficial owners of the company needs to be disclosed**.

## ANNEX 6. PERSONAL DATA DISCLOSURE UNDER EU FUNDS SHARED MANAGEMENT PROGRAMMING PERIOD 2021-2027

### Proposal for personal data disclosure for CAP (EAGF and EAFRD) in EU funds programming period 2021-2027

The extracts from the Proposal for a Regulation of the European Parliament and of the Council establishing rules on support for strategic plans to be drawn up by Member States under the Common agricultural policy (CAP Strategic Plans) and financed by the European Agricultural Guarantee Fund (EAGF) and by the European Agricultural Fund for Rural Development (EAFRD) and repealing Regulation (EU) No 1305/2013 of the European Parliament and of the Council and Regulation (EU) No 1307/2013 of the European Parliament and of the Council<sup>62</sup> on beneficiary data disclosure requirements are provided in the table below.

Reference	Requirement
Article 136	<p><i>Exchange of information and documents</i></p> <p>The Commission, in collaboration with the Member States, shall establish an information system to enable the secure exchange of data of common interest between the Commission and each Member State.</p>
Article 137	<p><i>Processing and protection of personal data</i></p> <p>Member States and the Commission shall collect personal data for the purpose of carrying out their respective management control, monitoring and evaluation obligations.</p> <p>Personal data shall be processed in accordance with the rules of Regulations (EC) No 45/2001 and (EU) No 2016/679. In particular, such data shall not be stored in a form which permits identification of data subjects for longer than is necessary for the purposes for which they were collected or for which they are further processed, taking into account the minimum retention periods laid down in the applicable national and Union law.</p> <p>Member States shall inform the data subjects that their personal data may be processed by national and Union bodies that in this respect they enjoy the data protection rights provided by Regulations (EC) No 45/2001 and (EU) No 2016/679.</p>

The Extracts from the Proposal for a Regulation of the European Parliament and of the Council on the financing, management and monitoring of the common agriculture policy and repealing regulation 1306/2013 defines requirements<sup>63</sup> on beneficiary data disclosure requirements are provided in the table below.

<sup>62</sup> <https://eur-lex.europa.eu/legal-content/EN/ALL/?uri=CELEX:52018PC0392>

<sup>63</sup> <https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=COM%3A2018%3A393%3AFIN>

Reference	Requirement
Article 96	<p><i>Publication of information relating to beneficiaries</i></p> <p>Member States shall ensure annual ex-post publication of the beneficiaries of the Funds in accordance with [Article 44(3)-(5) of Regulation (EU) .../...CPR Regulation] and paragraphs 2, 3 and 4 of this Article.</p> <p>2.[Article 44(3)-(5) of Regulation (EU) .../...CPR Regulation] shall apply in respect of beneficiaries of EAFRD and EAGF, where relevant; however, the amounts corresponding to the national contribution and the co-financing rate, as provided for in points (h) and (i) of Article 44(3) of that Regulation shall not apply to EAGF.</p> <p>The information referred to in Article 44(3)-(5) of that Regulation shall be made available on a single website per Member State. It shall remain available for two years from the date of the initial publication.</p> <p>Member States shall not publish the information referred to in points (a) and (b) of Article 44(3) of the Regulation (EU) .../...[CPR Regulation] if the amount of aid received in one year by a beneficiary is equal to or less than EUR 1 250.</p>

The proposed CAP regulatory framework includes requirements on information exchange and processing by providing a **reference to Common Provisions Regulation (CPR)**.

### Proposal for personal data disclosure for ERDF, ESF+, CF, EMFF in EU funds programming period 2021-2027

The extracts from the Proposal for a Regulation of the European Parliament and of the Council laying down common provisions on the ERDF, ESF+, CF, and EMFF and financial rules for those and for the Asylum and Migration Fund, the Internal Security Fund and the Border Management and Visa Instrument<sup>64</sup> on beneficiary data disclosure requirements are provided in the table below.

Reference	Requirement
Article 44	<p><i>Responsibility of the managing authority</i></p> <p>The managing authority shall make the list of operations selected for support by the Funds publicly available on the website in at least one of the official languages of the Union and shall update that list at least every three months. Each operation shall have a unique code. The list shall contain the following data:</p> <ul style="list-style-type: none"> <li>• in the case of legal entities, the beneficiary's name</li> <li>• where the beneficiary is a natural person, the first name and the surname</li> <li>• name of the operation</li> <li>• the purpose of the operation and its achievements</li> <li>• start date of the operation</li> <li>• expected or actual date of completion of the operation</li> <li>• total cost of the operation</li> <li>• Fund concerned</li> <li>• specific objective concerned</li> <li>• Union co-financing rate</li> <li>• location indicator or geolocation for the operation and country concerned</li> <li>• the region on NUTS 2 level where the beneficiary is a natural person</li> </ul>

<sup>64</sup> <https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=COM%3A2018%3A375%3AFIN>

Reference	Requirement
	<ul style="list-style-type: none"> <li>• for mobile operations or operations covering several locations the location of the beneficiary where the beneficiary is a legal entity</li> <li>• type of intervention for the operation</li> <li>• The name and surname of the beneficiary shall be removed after two years from the date of the initial publication on the website</li> <li>• The managing authority shall inform the beneficiaries that the data will be made public</li> </ul>

According to the CPR proposal the following information on beneficiaries shall be disclosed: first name and surname, NUTS2 region. Those requirements correspond to the requirements included in the Financial Regulation.

Under CPR proposal it is **not possible to identify natural persons with complete certainty** as disclosure of the person identification number is not required.

Under CPR proposal the company is identified only by the company name and **no information on the company registration number, owner and beneficial owner of the company needs to be disclosed. Information on beneficiary can be stored only for two years.**

### Proposal for personal data disclosure for the European Territorial Cooperation goal (Interreg) in EU funds programming period 2021-2027

The extracts from the Proposal for a Regulation of the European Parliament and of the Council on specific provisions for the European territorial cooperation goal (Interreg) supported by the European Regional Development Fund and external financing instruments<sup>65</sup> on beneficiary data disclosure requirements are provided in the table below.

Reference	Requirement
Article 35	<p><i>Responsibilities of managing authorities and partners with regard to transparency and communication</i></p> <p>The managing authority shall ensure that, within six months of the Interreg programme's approval, there is a website where information on each Interreg programme under its responsibility is available, covering the programme's objectives, activities, available funding opportunities and achievements.</p> <p>Each partner of an Interreg operation or each body implementing a financing instrument shall acknowledge support from an Interreg fund, including resources reused for financial instruments in accordance with Article [56] of Regulation (EU) [new CPR], to the Interreg operation by:</p> <p>providing on the partner's professional website, where such a website exists, a short description of the Interreg operation, proportionate to the level of support provided by an Interreg fund, including its aims and results, and highlighting the financial support from the Union</p>

The ETC proposal **does not include any requirement to disclose information on the beneficiaries.**

<sup>65</sup> <https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=COM%3A2018%3A374%3AFIN>

---

This reports provides the preliminary findings of the study on “The Largest 50 beneficiaries in each EU Member State of CAP and Cohesion Funds” prepared at the requested of the Budgetary Control committee.

It provides the results of an assessment of almost 300 systems for the public disclosure beneficiaries of the common agricultural policy (CAP) and cohesion policy. Moreover, it provides the preliminary results for the analysis of about 10 million beneficiaries of the CAP in 2018 and 2019 and more than 500 000 projects receiving cohesion funds between 2014 and 2020.

Finally, it assesses the barriers to more data transparency and possibilities to enhance the transparency.

---
